General Relativity for Mathematicians R.K. Sachs, H.-H. Wu, 2012-12-06 This is a book about physics written for mathematicians The readers we have in mind can be roughly described as those who I am mathematics graduate students with some knowledge of global differential geometry 2 have had the equivalent of freshman physics and find popular accounts of astrophysics and cosmology interesting 3 appreciate mathematical clarity but are willing to accept physical motivations for the mathematics in place of mathematical ones 4 are willing to spend time and effort mastering certain technical details such as those in Section 1

1 Each book disappoints so many readers This one will disappoint 1 physicists who want to use this book as a first course on differential geometry 2 mathematicians who think Lorentzian manifolds are wholly similar to Riemannian ones or that given a sufficiently good mathematical background the essentials of a subject like cosmology can be learned without so much hard work on boring details 3 those who believe vague philosophical arguments have more than historical and heuristic significance that general relativity should somehow be proved or that axiomatization of this subject is useful 4 those who want an encyclopedic treatment the books by Hawking Ellis 1 Penrose 1 Weinberg 1 and Misner Thorne Wheeler I go further into the subject than we do see also the survey article Sachs Wu 1

5 mathematicians who want to learn quantum physics or unified field theory unfortunately quantum physics texts all seem either to be for physicists or merely concerned with formal mathematics

Interactive Quantum Mechanics Siegmund Brandt, Hans D. Dahmen, T. Stroh, 2013-06-05 Interactive Quantum Mechanics under Java presents the most up to date approach to elementary quantum mechanics Based on the interactive program INTERQUANTA included on a CD ROM and ready to run under the WINDOWS LINUX and MACINTOSH operating systems and its extensive 3D color graphic features the book guides its readers through computer experiments on free particles and wave packets bound states in various potentials coherent and squeezed states in time dependent motion scattering and

 Hans-Jürgen Hellberg, 2022-01-12 This exercise book is primarily intended to prepare students for studies at universities of  
 applied sciences The high school graduation or the specialized university entrance qualification is required for admission to a  
 university degree program In addition there is also the possibility to study with a higher professional qualification such as the  
 master craftsman or as a graduate of a two year recognized technical school Especially here however deficits in mathematics  
 and the fundamentals of natural sciences often become apparent so that students cannot successfully begin their studies to  
 become industrial civil mechanical or even electrical engineers The same applies if the date of the university entrance  
 qualification already lies somewhat in the past In order to ensure that the necessary tools such as mathematics or the  
 fundamentals of science are available at the start of studies Dr Ing J rgen Schl sing and Diploma Physicist Hans J rgen
