**Graph Theory Notes of New York** ,2004 **Molecular Topology** Mircea V. Diudea,Ivan Gutman,Lorentz Jantschi,2001 Most yet not all chemical substances consist of molecules The fact that molecules have a structure is known since the middle of the 19th century Since then one of the principal goals of chemistry is to establish the relationships between the chemical and physical properties of substance and the structure of the corresponding molecules Countless results along these lines have been obtained along these lines and presented in different publications in this field One group uses so called topological indices About 20 years ago there were dozens of topological indices but only a few with noteworthy chemical applications Over time their numbers have increased enormously At this moment here is no theory that could serve as a reliable guide for solving this problem This book is aimed at giving a reasonable comprehensive survey of the present fin de si cle state of art theory and practice of topological indices
