requirements as they have advanced to achieve greater accuracy across a variety of domains As these DNNs have been growing they have also found use in a variety of applications that may be for instance latency or energy constrained This work explores distributed inference across multiple heterogeneous devices as a method to meet optimization objectives That is each layer of the DNN is assigned to be computed on a particular device to e g minimize latency The distributed inference problem is modeled as a flexible and extensible integer linear program ILP We then explore a variety of novel distributed inference approaches by extending this model showing that these approaches improve objectives such as latency or energy compared to prior work We first model a technique to reduce overall latency called weight preloading taking advantage of opportunities to overlap compute and data movement Then based upon our observations during profiling we introduce a novel constraint to ensure correct layer assignments and demonstrate a new technique for reducing profiling effort We also demonstrate that device operating frequency may be used as a knob of control alongside layer assignment to trade off latency and energy during distributed inference Finally the model is extended to minimize carbon footprint over an application duration demonstrating that distributed inference can be utilized to reduce environmental impact This work demonstrates that distributed inference as modeled by our ILP formulations can effectively address a variety of application objectives **Forest and Stream** ,1897 **The Imperial Encyclopaedic Dictionary** Robert Hunter,1901 **Harpers Weekly** John Bonner,George William Curtis,Henry Mills Alden,Samuel Stillman Conant,Montgomery Schuyler,John Foord,Richard Harding Davis,Carl Schurz,Henry Loomis Nelson,John Kendrick Bangs,George Brinton McClellan Harvey,Norman Hapgood,1871 *A Standard Dictionary of the English Language ...* ,1904 **Edge Computing for Distributed Deep Neural Network Inference** Cian-You Yang,2019 **International Aerospace Abstracts** ,1998 **The Deseret Weekly** ,1890 *Harper's Bazaar* ,1883 **The Youth's Companion** Nathaniel Willis,Daniel Sharp Ford,1919 Includes music
