*A Parallel Postsecondary Universe* Clifford Adelman,2000 This report describes a new system of credentialing that has arisen in the information technology and telecommunications industries over the past decade It compares this system to traditional higher education identifying both similarities and dissimilarities and points to some cases in which the two interact The summary section of this report emphasizes the major themes of the certification system and its relationship to higher education

- 1 The system is global and operates in many languages
- 2 The student not the institution is at the center of the system
- 3 The system has brought competency based education and performance assessment to a status they have never enjoyed within traditional higher education
- 4 Certification replace neither experience nor degrees and the IT system does not pretend to be higher education

the summary also indicates the critical need for more information on certification candidates and providers of course work since the new system is now large enough to play a role in state and national planning for postsecondary education

HoF text adopted **Start Your Own e-Learning Business** Entrepreneur Press,2004-07-01 In the Information Age the personal computer is becoming as pervasive as the telephone and television It accesses vast stores of constantly changing information and the ability to navigate it and the Internet has become a professional necessity for a majority of white and blue collar jobs And the key to opening that doorway is computer based learning e learning Using computers for education and training an industry that barely existed a decade ago is a fast growing business opportunity for enterprising people who enjoy helping others learn and who are comfortable with computers Start Your Own e Learning Business shows you how to become the person people turn to when they need to catch up on essential skills and knowledge This guide covers the vast selection of roles you can choose from including Teaching businesses computer basics management techniques or programming skills Publishing guides to help employees understand their firm s software Producing interactive content that explains products to customers Creating Web sites to help students do their homework or seniors hone their Internet skills Providing content marketing help or tech services for other e learning firms Brokering classes recruiting students or reselling CD based courses for other businesses
