Heating Cooling Lighting Sustainable Design Methods For Architects:

Heating, Cooling, Lighting Norbert Lechner, 2014-10-13 Sustainable environmental control through building design Heating Cooling and Lighting is the industry standard text on environmental control systems with the emphasis on sustainable design By detailing the many factors that contribute to the comfort in a building this book helps architects minimize mechanical systems and energy usage over the life of the building by siting building design and landscaping to maximize natural heating cooling and lighting This new fourth edition includes new information on integrated design strategies and designing for the Tropics Resources include helpful case studies checklists diagrams and a companion website featuring additional cases an image bank and instructor materials Designing buildings that require less energy to heat cool and light means allowing the natural energy of the sun and wind to reduce the burden on the mechanical and electrical systems Basic design decisions regarding size orientation and form have a great impact on the sustainability cost and comfort of a building Heating Cooling and Lighting provides detailed guidance for each phase of a design project Readers will Understand the concept of sustainability as applied to energy sources Review the basic principles of thermal comfort and the critical role of climate Learn the fundamentals of solar responsive design including active and passive solar systems as well as photovoltaics Discover how siting architectural design and landscaping can reduce the requirements for mechanical and electrical systems In sustainable design mechanical and electrical systems should be used to only accomplish what the architect could not by the design of the building itself With this in mind designers require a comprehensive understanding of both the properties of energy and the human factors involved in thermal comfort Heating Cooling and Lighting is the complete industry leading resource for designers interested in sustainable environmental control

Heating, Cooling, Lighting Norbert M. Lechner, Patricia Andrasik, 2021-09-20 The essential guide to environmental control systems in building design For over 25 years Heating Cooling Lighting Sustainable Design Strategies Towards Net Zero Architecture has provided architects and design professionals the knowledge and tools required to design a sustainable built environment at the schematic design stage This Fifth Edition offers cutting edge research in the field of sustainable architecture and design and has been completely restructured based on net zero design strategies Reflecting the latest developments in codes standards and rating systems for energy efficiency Heating Cooling Lighting Sustainable Design Strategies Towards Net Zero Architecture includes three new chapters Retrofits Best practices for efficient energy optimization in existing buildings Integrated Design Strategies for synergizing passive and active design Design Tools How to utilize the best tools to benchmark a building s sustainability and net zero potential Heating Cooling Lighting Sustainable Design Strategies Towards Net Zero Architecture is a go to resource for practicing professionals and students in the fields of environmental systems technology or design environmental design systems construction technology and sustainability technology

Heating, Cooling, Lighting Norbert Lechner, 2008-11-24 One of the leading references on the design of a building s environmental

controls has just gotten better For years Heating Cooling Lighting has supplied architects and students with the strategies needed for initial design decisions for building systems The book looks at how to design the form of the building itself to take advantage of natural heating cooling and lighting and how to best utilize active mechanical equipment to satisfy the needs not provided by nature This new edition has been expanded and updated to reflect the latest codes standards and energy efficiency rating systems

Heating, Cooling, Lighting Norbert Lechner, 1991-01-16 Using a qualitative rather than a quantitative approach presents detailed information based on concepts rules guidelines intuition and experience for architects in the areas of heating cooling and lighting at the schematic design stage The data explored supports a three tiered approach load avoidance using natural energy sources and mechanical equipment Among the topics covered are shading thermal envelope passive heating and cooling electric lighting and HVAC Case studies illustrate how certain buildings use techniques at all three tiers for heating cooling and lighting An appendix lists some of the more appropriate computer programs available to the architect for analysis at the schematic design stage

Plumbing, Electricity, Acoustics Norbert M. Lechner, 2011-11-29 Discover sustainable methods for designing crucial building systems for architects This indispensable companion to Norbert Lechner's landmark volume *Heating Cooling Lighting Sustainable Design Methods for Architects* Third Edition completes the author's mission to cover all topics in the field of sustainable environmental control It provides knowledge appropriate for the level of complexity needed at the schematic design stage and presents the most up to date information available in a concise logical accessible manner and arrangement Although sustainability deals with many issues those concerning energy and efficiency are the most critical making an additional goal of this book one of providing architects with the skills and knowledge needed to create buildings that use electricity and water efficiently Guidelines and rules of thumb are provided to help designers make their buildings use less energy less water and less of everything else to achieve their primary objectives In addition this book Addresses ways to reduce electricity usage through more efficient lighting systems and appliances and by incorporating automatic switches and control systems that turn off systems not in use Covers the design of well planned effluent treatment systems that protect against potential health hazards while also becoming a valuable source of reclaimed water and fertilizer Provides coverage of fire protection and conveyance systems including very efficient types of elevators and escalators and designs that encourage the use of stairs or ramps Complete with case studies that illustrate how these systems are incorporated into large project plans *Plumbing Electricity Acoustics* is an indispensable resource for any architect involved in a sustainable design project

Energy-Efficient Timber-Glass Houses Vesna Žegarac Leskovar,Miroslav Premrov,2013-09-30 The book discusses combining timber and glass two eco materials with a view to developing an optimal contemporary energy efficient house with an attractive design Furthermore the book connects an architectural design approach with structural research to show the possibilities of stabilizing the building with an

increased size of the glazing Research results where the glazing is considered as a load bearing structural element are therefore presented in a manner leading to the development of an optimal model of the timber glass house considering both the structural and energy related aspects The presented research work can be useful to designers and future experts in their planning of optimal energy efficient timber buildings The study is based on using timber and glass which were previously neglected as construction materials With suitable technological development and appropriate use they are nowadays becoming essential construction materials as far as energy efficiency is concerned However their combined use is extremely complicated from both the constructional point of view as well as from that of energy efficiency and sets multiple traps for designers A good knowledge of their advantages and drawbacks is thus vitally important which is shown in the present monograph Energy efficient timber glass houses was selected by the Slovenian National Research Agency as an extraordinary scientific achievement in the field of technical sciences civil engineering for the year 2013 [Sustainable Architecture](#) Valentina Frighi,Stanislav Kolisnychenko,2022-08-05 Aggregated Book [Sustainable Environment and Transportation](#) Ming Jin Chu,Hui Zhong Xu,Zhi Lin Jia,Yun Fan,Jiang Ping Xu,2012-05-14 Selected peer reviewed papers from the 2nd International Conference on Civil Engineering Architecture and Building Materials CEABM 2012 May 25 27 2012 Yantai China **Architecture Exam Review: Nonstructural topics** Steven E.
