Multidimensional development of student-athletes: new perspectives on dual-career Ricardo Quinaud, Mojca Doupona, Laura Capranica, Flavia Guidotti, 2025-10-27 Over the past decades the investigation of the dual career phenomenon among student athletes has witnessed noteworthy advancements It is well known the demands and challenges to achieve a mastery elite performance in sport combined with academic commitments However studies have reported segmented information on it mostly due to the difficulty of investigating those several aspects that influence the development of a dual career and the perspective of adopting a unidimensional view Consequently there is a pressing need to embrace a comprehensive multidimensional view to prepare them for any future that they can be expecting Such an encompassing perspective is paramount in discerning their requisites and proactively equipping them for the diverse range of future possibilities they may encounter A singular viewpoint bereft of a holistic purview may engender misapprehensions about their dual career trajectories In light of this we want to encourage researchers to combine their knowledge with the practical context lived by millions of student athletes all over the world Thus our goal with this special issue is to bring the most recent advances in student athlete dual career and look forward to how all this knowledge can improve student athlete development worldwide from a multidimensional perspective In order to achieve these goals we encourage manuscripts on any of the following topics Student athletes dual career transitions sports policies and legislation on student athletes dual career sports management on student athletes dual career psychological measures on student athletes dual career paralympic student athlete dual career student athletes dual career programs and environments student athletes dual career supporters measures of sport and educational demands and loadings on student athletes dual career worker athletes dual career methodological approaches designs and gaps in research into student athletes dual career
