Cognitive Kin Christophe Kolb, Jan Rosen, 2026-03-10 Now that AI has a will it s up to us to find a way For decades we built software that did what it was told and nothing else Agentic AI breaks this bargain systems that remember reason and pursue goals They arrive less like code and more like colleagues tireless fast and like any new hire occasionally in need of supervision In Cognitive Kin Christophe Kolb and Jan Rosen map the threshold where artificial intelligence stops being a feature and becomes a workforce Drawing on firsthand experience at the frontier of agentic AI they show how digital labor becomes viable why org charts give way to networks of intent and how leadership shifts to orchestration They translate the machinery memory feedback loops tool use into plain language then follow the shockwave into strategy culture and governance This isn t tomorrow s speculation It s a present tense transition that is reshaping the meaning of work and creating new sources of value The advantage will belong to firms that learn to think with thinking things working alongside intelligent systems without outsourcing judgment meaning or responsibility

International Conference on Smart Environment and Green Technologies - ICSEGT2024 Fahreddin Sadikoglu Mammadov, Rafik A. Aliev, Janusz Kacprzyk, Witold Pedrycz, 2025-01-04 This book compiles state of the art studies and real world applications in ecosystems and smart environments It covers important subjects like creating a sustainable economy green and renewable energy and IoT powered industrial and agricultural systems Along with providing insights into theory modelling and the deployment of smart cities and infrastructure the book also examines the use of AI in the earth and environmental sciences and economy The book is intended to be a priceless tool for scholars professionals and

recent graduates It acts as a manual and source of inspiration for promoting environmentally friendly technologies and sustainable solutions It opens the door for creating intelligent systems that maximise resource use reduce carbon footprints and enhance general quality of life by incorporating the most recent technological developments *Decision-Making in Business Management through Artificial Intelligence and Machine Learning* Joeleen Kimbell,2025-02-03 Case Study from the year 2024 in the subject Business economics E Commerce grade A language English abstract This paper focuses on how Artificial Intelligence and Machine Learning have changed decisions in retailing healthcare financing and manufacturing careers They demonstrate how AI is used in supply chain management to support the decision making process by making forecasts processing data and optimizing operations leading to higher efficiency decreased costs and increased customer satisfaction Thus the research incorporates quantitative and qualitative approaches such as surveys and interviews with key stakeholders and employs statistical and content analysis methods While adopting the decision theory and systems thinking perspectives this research paper highlights the necessity of effectively and adequately implementing AI into an organization permanently to achieve more benefits The following are realizable out of the box solutions that the study suggests including audiences for employees data protection for compliance and conscientization of fairness in AI algorithms Future directions include situations where these applications are to be broadened to weigh on ethical issues and to encourage optimal technological fairness that will in turn ensure sustainable business improvement and innovation

A Multidisciplinary Approach to KIIT Horizons, Volume 1 Pratiti Nayak,Kıymet Tunca Çalıyurt,2025-09-26 This book explores the effects of Artificial Intelligence AI across different disciplines As AI applications continue to progress serious concerns arise about effectively protecting the copyright of items they produce Each country views AI as an author while maintaining rights differently resulting in the compelling necessity for an international dialogue on legal standards The present copyright framework does not provide sufficient solutions for AI authorship intricacies and raises doubts about classic notions of invention and source The distinctions show an increasing demand for a global legal system that can address the unique characteristics of AI generated content Investigating legal policies for AI created works underscores the critical demand for a copyright approach that accounts for human involvement Recognizing the actual owner and the original creator is complicated when AI operates with substantial control Present statutes fail to clarify the complexities linked to human artistic contributions The rationale behind developing a single system is based on valuing AI produced material as a unique category of intellectual property As AI becomes more significant in creative fields legal dialogues must also be similarly enhanced The approaches considered in the book strive to build improved regulations that represent the progress in AI technology and the basic concepts of copyright The book goes on to propose a consistent policy model to confront AI obstacles related to intellectual property and would be a valuable read for policy makers and AI enthusiasts alike
