subjects I studied hard and after passing the exam I decided to prepare a series of civil and structural PM questions along with their step by step solution based on my experiences For PE exam preparation you need tools other than your daily experience You will be examined for a variety of knowledge codes and standards Good resources and classes will equip you for the morning exam The only way you can pass the exam is to use your time efficiently as well as a good score for the afternoon PM part The following problems have been prepared for the candidates who have civil structural background and are only for PM practices purposes Some of the problems are very comprehensive and it may cover multiple questions However for training purposes it is included in one question My emphasis is to show what you need to focus on and never underestimate any point that you may think it would not be question in exam I hope this book can help you even a little bit for achieving your great goal All the best
