**Handbook of Research on Social Interaction Technologies and Collaboration Software: Concepts and Trends** Dumova, Tatyana,Fiordo, Richard,2009-07-31 This book explores the origin structure purpose and function of socially interactive technologies known as social software Provided by publisher [Overcoming Challenges in Software Engineering Education: Delivering Non-Technical Knowledge and Skills](#) Yu, Ligu,2014-03-31

Computer science graduates often find software engineering knowledge and skills are more in demand after they join the industry. However, given the lecture-based curriculum present in academia, it is not an easy undertaking to deliver industry standard knowledge and skills in a software engineering classroom as such lectures hardly engage or convince students.

**Overcoming Challenges in Software Engineering Education: Delivering Non-Technical Knowledge and Skills** combines recent advances and best practices to improve the curriculum of software engineering education. This book is an essential reference source for researchers and educators seeking to bridge the gap between industry expectations and what academia can provide in software engineering education. *Agile Processes in Software Engineering and Extreme Programming* Alberto Sillitti, Orit Hazzan, Emily Bache, Xavier Albaladejo, 2011-05-02. This book contains the refereed proceedings of the 12th International Conference on Agile Software Development XP 2011 held in Madrid, Spain, in May 2011. The year 2011 marked the 10th anniversary of the Agile Manifesto. In this spirit, the XP conference continued its fine tradition of promoting agility by disseminating new research results in a timely manner and by bringing together researchers and practitioners for a fruitful mutual exchange of experiences. As introduced for XP 2010, there were again two different program committees: one for research papers and one for experience reports. Regarding the research papers, 11 out of 56 submissions were accepted as full papers, and as far as the experience reports were concerned, the respective number was 4 out of 17 submissions. In addition to these papers, this volume also includes the short research papers, the abstracts of the posters, the position papers of the PhD symposium, and the abstracts of the workshops.

*Lead Without Blame* Diana Larsen, Tricia Broderick, 2022-09-27. A detailed framework for leaders to move past outdated workplace blame and shame strategies to cultivate resilient teams capable of facing adversity and setbacks confidently. Workplace finger-pointing stifles creativity, reduces productivity, and limits psychological safety. Although no one sets out to be judgmental, learning new habits is hard. Two experienced leadership and agile coaches share a road-tested leadership model that continuously embraces humility and failure as part of the growth process to deliver results. By facilitating blame-free retrospective meetings, leaders chart a productive path forward. They amplify three essential motivators: purpose, autonomy, and co-intelligence within their team. Layered on with four resilience factors: inclusive collaboration, transparent power dynamics, collaborative learning, and embracing conflict. After applying these strategies, learning leaders will help their teams and themselves become more resilient and better equipped to handle any unexpected and challenging tasks that come their way.
