Efficient And Adaptive Estimation For Semiparametric Models:

Efficient and Adaptive Estimation for Semiparametric Models Peter J. Bickel, Chris A.J. Klaassen, Ya'acov Ritov, Jon A. Wellner, 1998-06-01 This book deals with estimation in situations in which there is believed to be enough information to model parametrically some but not all of the features of a data set Such models have arisen in a wide context in recent years and involve new nonlinear estimation procedures Statistical models of this type are directly applicable to fields such as economics epidemiology and astronomy *Selected Works of Peter J. Bickel* Jianqing Fan, Ya'acov Ritov, C.F. Jeff Wu, 2012-11-28 This volume presents selections of Peter J Bickel's major papers along with comments on their novelty and impact on the subsequent development of statistics as a discipline Each of the eight parts concerns a particular area of research and provides new commentary by experts in the area The parts range from Rank Based Nonparametrics to Function Estimation and Bootstrap Resampling Peter's amazing career encompasses the majority of statistical developments in the last half century or about about half of the entire history of the systematic development of statistics This volume shares insights on these exciting statistical developments with future generations of statisticians The compilation of supporting material about Peter's life and work help readers understand the environment under which his research was conducted The material will also inspire readers in their own research based pursuits This volume includes new photos of Peter Bickel his biography publication list and a list of his students These give the reader a more complete picture of Peter Bickel as a teacher a friend a colleague and a family man **Mathematical Statistics and Applications** Constance van Eeden, Marc Moore, 2003

Robust Estimation in Semiparametric Models Zaiqian Shen, 1992 **Frontiers in Statistics** Jianqing Fan, 2006 During the last two decades many areas of statistical inference have experienced phenomenal growth This book presents a timely analysis and overview of some of these new developments and a contemporary outlook on the various frontiers of statistics Eminent leaders in the field have contributed 16 review articles and 6 research articles covering areas including semi parametric models data analytical nonparametric methods statistical learning network tomography longitudinal data analysis financial econometrics time series bootstrap and other re sampling methodologies statistical computing generalized nonlinear regression and mixed effects models martingale transform tests for model diagnostics robust multivariate analysis single index models and wavelets This volume is dedicated to Prof Peter J Bickel in honor of his 65th birthday The first article of this volume summarizes some of Prof Bickel's distinguished contributions **Journal of Statistical Planning and Inference** North-Holland Publishing Company, 2002 *Celebrating Statistics* A. C. Davison, Yadolah Dodge, N. Wermuth, 2005-09-22 Sir David Cox is among the most important statisticians of the past half century He has made pioneering and highly influential contributions to a uniquely wide range of topics in statistics and applied probability His teaching has inspired generations of students and many well known researchers have begun as his graduate students or have worked with him at early stages of their careers Legions of others have been stimulated and enlightened by the clear concise

and direct exposition exemplified by his many books, papers and lectures. This book presents a collection of chapters by major statistical researchers who attended a conference held at the University of Neuchâtel in July 2004 to celebrate David Cox's 80th birthday. Each chapter is carefully crafted and collectively presents current developments across a wide range of research areas from epidemiology, environmental science, finance, computing, and medicine. Edited by Anthony Davison, Ecole Polytechnique Fédérale de Lausanne, Switzerland; Yadolah Dodge, University of Neuchâtel, Switzerland; and N. Wermuth, Göteborg University, Sweden, with chapters by Ole E. Barndorff-Nielsen, Sarah C. Darby, Christina Davies, Peter J. Diggle, David Firth, Peter Hall, Valerie S.
