Reports of Cases Before the Court of Justice and the Court of First Instance ,2011 Information

Asymmetries in EU VAT Frank J.G. Nellen,2016-04-24 Unlike conventional direct taxes the application and administration of value added tax VAT depends to a considerable extent on the exchange of information between the taxable person and his transaction counterparts In practice the taxable person often fails to obtain necessary information from his transaction counterparts giving rise to information asymmetries that can induce VAT assessments sanctions and audits In its up to date overview of European Union EU VAT law this book assesses legislation case law and practice at EU and national levels in the process of examining how to minimize the risks and negative consequences associated with information asymmetries As a result of his in depth treatment of the subject the author establishes the following to what extent information asymmetries in EU VAT have legal implications e g VAT assessments fines for the taxable person to what extent information asymmetries should have legal implications for the taxable person taking into account the legal principles applicable in EU VAT to what extent positive EU VAT law indeed implies the risk of information asymmetries and any associated unjustified legal implications and to what extent legal remedies should be employed to avoid or to reduce information asymmetries for the taxable person This is the first book to conduct thorough research into the causes and legal implications of information asymmetries as well as the instruments which can be employed to counter their materialization As such it will be of inestimable value to practitioners legislators policymakers entrepreneurs judicial professionals and academics concerned with EU VAT law
