***Ability to perform the required functions under a stated condition for a defined time period***

## Basics in Reliability

---

- What is reliability

- Reliability is defined as the probability that an item will perform a required function without failure under stated conditions for a stated period of time."
  - A functional definition of failure is needed. For example, a failure means different things to the user and to the repair person.
  - The system's operating conditions must be specified (e.g. car or home environment).
