I've ever studied from. When I'm studying from this book it feels like I've hired a tutor because every problem is shown step by step. I just love how the book matches its example problems with practice problems because when I run into practice problems I don't understand I can always rely on going back to the example problems. With this book in hand I don't think anyone really needs to go to class to learn statistics because the book is so easy to comprehend and learn from. To be honest if you own this book you will definitely find it easy and fun.
