Eyes by Hand Dan Roche,2026-02-10 A personal and intimate view of the craft of eye making This is a book about artificial eyes about the artisans and artists who make them and about the life changing and sometimes life saving experience of wearing them as author Dan Roche has done for 15 years Eye making is done by hand for one person at a time by a very small number of ocularists fewer than 200 in the US it is a slow intricate and unusually intimate process of molding fitting and painting that brings ocularist and patient together for many hours or even days In Eyes by Hand Roche describes the craft that goes into the making of an eye that looks uncannily real as well as the psychological and emotional healing that such service brings to someone who has suffered the very visible trauma of eye loss a loss that can go to the heart of self identity In an engaging frankly fascinating fashion Roche captures the intricacies of a profession whose techniques and culture have been remarkably consistent for 200 years He explores too how that profession may now be facing a digital transformation in the form of scan print mail possibilities Such a change might make prosthetic eyes more easily and cheaply available though it may also risk the aesthetic qualities and intimate connection fundamental to the process of healing
