The Semantic Web - ISWC 2009 Abraham Bernstein, David R. Karger, Tom Heath, Lee Feigenbaum, Diana Maynard, Enrico Motta, Krishnaprasad Thirunarayan, 2009-10-08 As the Web continues to grow increasing amounts of data are being made available for human and machine consumption This emerging Semantic Web is rapidly entering the mainstream and as a result a variety of new solutions for searching aggregating and the intelligent delivery of information are being produced both in research and commercial settings Several new challenges arise from this context both from a technical and human computer interaction perspective e.g. as issues to do with the scalability and usability of Semantic Web solutions become particularly important The International Semantic Web Conference ISWC is the major international forum where the latest research results and technical innovations on all aspects of the Semantic Web are presented ISWC brings together researchers practitioners and users from the areas of artificial intelligence databases social networks distributed computing Web engineering information systems natural language processing soft computing and human computer interaction to discuss the major challenges and proposed solutions success stories and failures as well the visions that can advance the field **Big**

Data Mining and Complexity Brian C. Castellani, Rajeev Rajaram, 2022-03-01 This book offers a much needed critical introduction to data mining and big data Supported by multiple case studies and examples the authors provide Digestible overviews of key terms and concepts relevant to using social media data in quantitative research A critical review of data mining and big data from a complexity science perspective including its future potential and limitations A practical exploration of the challenges of putting together and managing a big data database An evaluation of the core mathematical and conceptual frameworks grounded in a case based computational modeling perspective which form the foundations of all data mining techniques Part of The SAGE Quantitative Research Kit this book will give you the know how and confidence needed to succeed on your quantitative research journey **Quantitative Methods in Aviation Management** Tony

Webber, 2023-01-24 This book applies tried and trusted statistical and analytical tools to aviation applications It is written for aviation analysts and management who must extract actionable insights from large volumes of data and need the right statistical and analytical methods to do so It will also appeal to undergraduate and postgraduate students of aviation management who will require an understanding of statistical and analytical methods when they begin their career in aviation and are awash with large volumes of data through which they must wade For aviation analysts managers and students to implement the techniques that are being presented in this book they must be combined with the right software It is for this reason that readers are taught how to use up to 40 Microsoft Excel functions to implement many of the techniques and they are also introduced to the econometrics software Eviews **Strategic Airport Planning** Mike Brown, 2022-04-10 This book will explore a new approach to airport planning that better captures the complexities and velocity of change in our contemporary world As a result it will lead to higher performing airports for users business partners investors and other

stakeholders This is especially pertinent since airports will need to come back better from the Covid 19 pandemic The book explains the importance of articulating a clear strategy based on a rigorous analysis of the competitive landscape while avoiding the pitfalls of ambiguity and virtue signalling Having done so demand forecasts can be developed that resemble S curves not simple straight lines that reflect strategic opportunities and threats from which a master plan can be developed to allocate land and capital in a way that maximizes return on assets and social licence The second distinctive feature of this book is the premise that planning an airport as an island a fortress even does not work anymore given how interconnected airports are with other components of the transportation system the economies and communities they serve and the rapid pace of social and technological change In summary the book argues that airport planning needs to move beyond its traditional boundaries The book is replete with real examples from airports of all sizes around the world and includes practical advice and tools for executives and managers It is recommended reading for individuals working in the airport business or the broader air transport industry members of airports board of directors who may be new to the business elected officials policy makers and urban planners in jurisdictions hosting or adjacent to airports regulators economic development professionals and finally students
