Metaheuristics and Optimization in Civil Engineering Xin-She Yang, Gebrail Bekdaş, Sinan Melih Nigdeli, 2015-12-10 This timely book deals with a current topic i.e. the applications of metaheuristic algorithms with a primary focus on optimization problems in civil engineering. The first chapter offers a concise overview of different kinds of metaheuristic algorithms explaining their advantages in solving complex engineering problems that cannot be effectively tackled by traditional methods and citing the most important works for further reading. The remaining chapters report on advanced studies on the applications of certain metaheuristic algorithms to specific engineering problems. Genetic algorithm, bat algorithm, cuckoo search, harmony search, and simulated annealing are just some of the methods presented and discussed step by step in real application contexts in which they are often used in combination with each other. Thanks to its synthetic yet meticulous and practice-oriented approach, the book is a perfect guide for graduate students, researchers, and professionals willing to apply metaheuristic algorithms in civil engineering and other related engineering fields such as mechanical, transport, and geotechnical engineering. It is also a valuable aid for both lectures and advanced engineering students. *Design and Modeling of Mechanical Systems - II* Mnaouar Chouchane, Tahar Fakhfakh, Hachmi Ben Daly, Nizar Aifaoui, Fakher Chaari, 2015-03-24 This book offers a collection of original peer-reviewed contributions presented at the 6th International Congress on Design and Modeling of Mechanical Systems CMSM 2015 held in Hammamet, Tunisia, from the 23rd to the 25th of March 2015. It reports on both recent research findings and innovative industrial applications in the fields of mechatronics and robotics, dynamics of mechanical systems, fluid-structure interaction, and vibroacoustics modeling and analysis of materials and structures, and design and manufacturing of mechanical systems. Since its first edition in 2005, the CMSM Congress has been held every two years with the aim of bringing together specialists from universities and industry to present the state of the art in research and applications, discuss the most recent findings, and exchange and develop expertise in the field of design and modeling of mechanical systems. The CMSM Congress is jointly organized by three Tunisian research laboratories: the Mechanical Engineering Laboratory of the National Engineering School of Monastir, the Mechanical Laboratory of Sousse, part of the National Engineering School of Sousse, and the Mechanical Modeling and Manufacturing Laboratory at the National Engineering School of Sfax. *Harmony Search Algorithm* Javier Del Ser, 2017-01-20 This book presents state-of-the-art technical contributions based around one of the most successful evolutionary optimization algorithms published to date. Harmony Search Contributions span from novel technical derivations of this algorithm to applications in the broad fields of civil engineering, energy, transportation, mobility, and health, among many others, and focus not only on its cross-domain applicability but also on its core evolutionary operators, including elements inspired from other metaheuristics. The global scientific community is witnessing an upsurge in groundbreaking new advances in all areas of computational intelligence, with a particular flurry of research focusing on evolutionary computation and bio-inspired

optimization Observed processes in nature and sociology have provided the basis for innovative algorithmic developments aimed at leveraging the inherent capability to adapt characterized by various animals including ants fireflies wolves and humans However it is the behavioral patterns observed in music composition that motivated the advent of the Harmony Search algorithm a meta heuristic optimization algorithm that over the last decade has been shown to dominate other solvers in a plethora of application scenarios The book consists of a selection of the best contributions presented at ICHSA a major biannual event where leading global experts on meta heuristic optimization present their latest findings and discuss the past present and future of the exciting field of Harmony Search optimization It provides a valuable reference resource for researchers working in the field of optimization meta heuristics and a solid technical base for frontline investigations around this algorithm
