

## **Chapter 1:**

### **BUSINESS LAW: An Introduction**

#### **MEANING OF LAW:**

In common usage, the term law points towards those rules and regulations which the government announces and enforces. In a formal sense, law may be described as a system of rules in a society for people to be followed under the enforcement by the state. If laws are violated, the state power will come into play to force the violators to either adhere to law or face adverse consequences. The members of a society are expected to know the law of a land.

#### **BRANCHES OF LAW:**

The term law may refer to the entire legal system of the society , or it may refer to the individual units or enactments operative in the system. Each individual law regulates a particular aspect of society's life. Therefore the individual laws can be grouped under several branches or categories of law, each branch indicating a broad aspect of society's life. Accordingly following branches of law can be as:

(a) **Constitutional law:** This branch includes laws which build and run the political system governing the society, regulate the relationship between the different organs of the state and determine the mutual rights and duties between the rulers and the ruled.

(b) **Civil law:** This branch includes numerous laws which regulate the private relationships between members of society. The individual members of a society may find themselves in bilateral or multilateral relationships or may consciously create such relationships for numerous purposes, like marriage, employment , business, membership in a family etc. These relationships can give rise to causes for grievances of one against the other. Such laws which protect the rights of individuals against each other are part of civil law.
