Ylimaki,2017-10-04 This book is open access under a CC BY 4 0 license This volume argues for the need of a common ground that bridges leadership studies curriculum theory and Didaktik It proposes a non affirmative education theory and its core concepts along with discursive institutionalism as an analytical tool to bridge these fields It concludes with implications of its coherent theoretical framing for future empirical research Recent neoliberal policies and transnational governance practices point toward new tensions in nation state education These challenges affect governance leadership and curriculum involving changes in aims and values that demand coherence Yet the traditionally disparate fields of educational leadership curriculum theory and Didaktik have developed separately both in terms of approaches to theory and theorizing in USA Europe and Asia and in the ways in which these theoretical traditions have informed empirical studies over time An additional aspect is that modern education theory was developed in relation to nation state education which in the meantime has become more complicated due to issues of globopolitanism This volume examines the current state of affairs and addresses the issues involved In doing so it opens up a space for a renewed and thoughtful dialogue to rethink and re theorize these traditions with non affirmative education theory moving beyond social reproduction and social transformation perspectives   **Covid-19: A Critical Care Textbook - E-Book** Chris Carter,Joy Notter,2021-08-11 With the major redeployment of staff during the Covid 19 pandemic this authoritative textbook provides a practical resource for healthcare professionals who may be new to acute and critical care settings Written by nurses for nurses the book will help readers master patient assessment non invasive ventilation the use of high flow nasal oxygenation and renal care You will learn about the challenges of resuscitation leadership and responding to a public health emergency and effective personal protection and hygiene practices Covid 19 Critical Care textbook has been written by experts with frontline experience of working in hospitals during the pandemic and will remain relevant for those responding to future infectious disease outbreaks or waves of Covid 19 Self assessment quizzes to support ongoing learning Suitable for staff re deployed and those already working in acute and critical care areas Fully illustrated to demonstrate the use of PPE and coronavirus specific procedures Contributions from key experts who have dealt directly with the disease provide practical insights   **Leadership** Peter G. Value-Oriented Leadership in Theory and Practice Jessica Lange,2023-04-17 This book provides a holistic view of the topic of values based leadership by bridging the important gap between understanding theory and applying it in practice Based on theoretically sound contributions from experts a systematic understanding is developed What are values in general and what do they mean in a business context What does value orientation mean How does it work in the different areas of leadership Practice oriented contributions by experienced practitioners offer orientation for value oriented leadership in every kind of company from the small to the large From structural familiarization with corporate leadership to day to day values based interactions with employees in people management you can find helpful inspiration in this book This book is attractive in its comprehensibility and authenticity It is about experiencing the life of values in a company as really meaningful necessary and feasible   Organizations between Continuity and Disruption – The Organization and Management of Perpetual Change in Times of Digitalization Thomas Wendt,Inga Truschkat ,Pia Bramming,2026-01-30 This Research Topic explores how continuity and disruption is problematized analyzed and theorized in times of digitalization considering the historicity of interdisciplinary organizational research The history of organization theory lines up chapter after chapter using different terms and models to increase theoretical resolution and provide new clarifications to organize lead and manage perpetual change A variety of management concepts claim to be able to design organizational structures and do so better than in the past The understanding of leadership also changes over time and with it the understanding of how influence on others and the relationships associated with it are realized This refers to leadership in for profit such as non profit organizations or educational leadership Briefly the history of organization management and leadership follows a line of continuity in that it changes incessantly This Research Topic addresses the question of how this normality of organizing change can be understood considering current societal challenges Different types of organizations can be of research interest in order to answer this question We are especially but not exclusively interested in organizational and managerial takes on Digitalization Digitalization and the spread of artificial intelligence provide new technical possibilities with a widespread impact on organizing and organizations Kette Tacke 2021 The fact that algorithms increasingly define scopes of action and decision making Wendt 2021 highlights the significance of formal organization du Gay 2020 once again Digital

structures and the use of artificial intelligence point to the fact that the perceptual capacity of human subjects as well as their creative abilities are increasingly substitutable by technology Manhart Wendt 2021 Maybe to the point where the human monopoly on creativity and learning is threatened Truschkat Bormann 2023 At the same time the implementation of digital technology leads to new ways of interaction among employees in organizations Bormann Truschkat 2022 Digitalization in organizations therefore generates both an empirical need for research into the emergence of cultures of digitality Stalder 2016 and a theoretical need for clarification regarding the validity of established terms and concepts to map these changes analytically Not only the digital transformation of and in organizations raises questions about the validity of existing approaches to organizational theory and issues of practical form Thus fluid virtual temporary and unconventional forms of organization Besio Tacke 2023 challenge interdisciplinary organizational research to revisit the validity and scope of its terms methods and concepts The fact that new organizational forms are accompanied by changed modes of governance evokes further questions for example which logic of diffusion is dominant in new concepts of management and leadership Bromley Meyer 2021 The COVID 19 pandemic showed that organizational transformations are more autologous than they are consequences of specific economic policies or programmatics Examples of this include forms of home office or implementation of digital infrastructure Adaptations are far more quickly realized on the employee side than on the organizational structure side Plotnikof et al 2020 The individual demand for democratization and participation in organizations is made urgent again by such processes of distributing responsibility Battilana et al 2022 But participation in turn depends on regulatory procedures and thus on formal organization to enforce individual participation claims in a binding form Wendt Manhart 2022 This tension between general requirements and individual demands in the context of digitalization is also central for other social and organizational demands on structural changes on organizing and organizations Sustainability for instance refers on a democratic and sustainable future which does not necessarily coincide with the inherent logic of organizational structures whose path dependencies Arthur 1994 Schrey gg Sydow 2010 perpetuate the past as future For the transformation of society towards more sustainability it plays a central role that attribution of organizational responsibility can also lead to organizations avoiding this responsibility Brunsson et al 2022 The organizational double challenge of digitalization and sustainability also indicates that their relationship is not free of contradictions Lenz Henkel 2023 Organizations can be digital but not sustainable just as sustainable but not digital The function role and logic of organizations regarding the challenges of sustainability transformation point to a need for theoretical and empirical research and thus to the question of the inertia and tempo of change demands The Research Topic aims to gather contributions that theoretically and empirically explore current transformation processes of and in organizations in times of Digitalization Thereby the intersection of Digitalization and other transformation challenges of organizations such as Sustainability Gender Equality or Diversity can also enrich the debate theoretically and empirically We

especially call for contributions that critically examine the relationship between continuity and disruption in times of Digitalization and the related question of the historicity of interdisciplinary organizational research Contributions from organizational education or organizational sociology are as welcome as from related disciplines Possible topics might include but are not limited to Theory and empirics of digital organization Dissemination and applications of artificial intelligence in organizations Subject and identity development in the context of organizational transformation in times of digitalization Theory and empirics of new forms of organization in times of digitalization Relationship between digitalization and other transformation challenges in organizations
