Query Builder  
Guide

## Introduction

The Business Objects Query Builder is a powerful tool that allows you to create and execute queries against your data sources. It provides a user-friendly interface for defining query criteria, filters, and sorting options. This guide will walk you through the various components and features of the Query Builder, helping you to maximize your productivity and efficiency in data analysis.

## Getting Started

To get started with the Business Objects Query Builder, you need to have a valid Business Objects license and access to a data source. Once you have these prerequisites, you can launch the Query Builder from the Business Objects desktop application. The interface is divided into several panes, including a Data Source pane, a Query Definition pane, and a Results pane. Each pane serves a specific purpose in the query-building process, and understanding their functions is essential for effective use.
