Handbook of Natural Colorants

Thomas Bechtold,Rita Mussak,2009-04-06 Concentration on renewable resources sustainability and replacement of oil based products are driving forces to reassess the potential of natural resources including natural colorants The growing consumer interest in purchasing green products which exhibit an improved environmental profile can be seen as the break through force needed to reintroduce natural colorants into the modern markets Written by scientists with specialised knowledge in the field Handbook of Natural Colorants provides a unique source of information summarising the present knowledge of natural colorants in depth Supporting researchers in this emerging field of sustainable chemistry it provides easy access to the theory and practice of natural colorants from different viewpoints including agricultural economic and legislative aspects Topics covered include History of coloration technology Present position of natural colorants Regional plant source availability Specific application techniques Chemical properties that professional dyers and chemists have to consider Agricultural sourcing of dyes with an emphasis on renewable resources Discussions on energy and material balance issues arising from the sourcing of materials Production aspects of colorants leading on to the key applications Environmental and economic aspects Also included are the pros and cons of natural dyestuffs presenting some promising results and evaluating

the potential use of vegetable dyes as alternatives to chemical based ones with a focus on green chemistry

Cyanotype Toning Annette Golaz, 2021-09-30 Cyanotype is the most accessible and frequently used of all the alternative photographic processes. When utilized properly it has the potential to rival other processes when it comes to detail and tonal range but its Prussian blue color isn't always suitable for the final photograph. Throughout history cyanotype prints have been toned not only with various and at times hazardous chemicals but also with more natural ingredients like tea and coffee. Since the cyanotype itself is non-toxic Cyanotype Toning will champion an innovative process developed by the author of toning cyanotypes with natural material. This process which is easy and reliable offers a much broader range of possible colors and even beautiful black and whites. Even duotone or tricolor prints can be attained. The book consists of two parts. Part One is a step by step how to section including all the information that a student at any level needs to achieve a successfully toned print. Easy to understand background information is provided on how and why the process works so that readers can venture on their own into the world of natural colors. The first part also has a detailed section on all the factors that can influence the outcome like paper choice, water quality, properties of the plants, temperature of the bath and the duration of the toning. Part Two is devoted to contemporary artists who have explored toning with botanicals and integrated the process into their creative practice. The book includes a list of equipment and supplies needed. In depth information about useful plants and the specific properties that make them suitable for toning cyanotypes. Concise step by step instructions for printing cyanotypes successfully. A chart of more than 60 tested papers with recommendations on paper choice. Step by step generic instructions on toning with botanicals. Troubleshooting toning with botanicals. More detailed recipes for specific colors with information about the plants. Step by step instructions on how to print duotone and tricolor prints. A range of creative ideas on how to use the process in classrooms and with different age groups. A comprehensive list of more than 380 tested parts of plants and possible color outcomes. Using botanicals to tone cyanotypes broadens the color spectrum, enlarges creative possibilities and makes the cyanotype process even more versatile. The process is not cut and dried science but a limitless field for discovery and surprises. Cyanotype Toning provides accessible information and instructions for readers at all levels. It is comprehensive and explanatory so that readers can expand on the subject on their own as did the contemporary artists who share their experiences and the works they have created using this innovative toning process.

Lichens (Collins New Naturalist Library, Book 86) Oliver Gilbert, 2010-08-19 Lichens are fascinating and beautiful organisms able to colonise a vast range of habitats including seemingly impossible places such as bare icy mountain tops and sun scorched coastal rocks. This book discusses all aspects of British lichens revealing the secrets of their success. This edition is exclusive to newnaturalists.com
