**DIGITAL POWER SYSTEM PROTECTION** S. R. BHIDE, 2014-10-01 Digital power system protection as a subject offers the use of computers in power line relaying which is the act of automatically controlling the power system via instrumentation and control devices This book is an attempt to make a gentle introduction to the nitty gritty of digital relays Written in a simple clear and student friendly style this text covers basics of digital processing of analog signals for the purpose of relaying All important basic algorithms that are used in various types of digital relays have been explained FIR and IIR filters have been presented in such a manner that students will be able to develop intuitive understanding The book also covers DFT and FFT and synchrophasor technology in details MATLAB programs and Excel simulations have been given to reinforce the comprehension of the algorithms This book has been thoroughly class room tested and based on course notes which is primarily intended for undergraduate and postgraduate students of electrical engineering Key Features In depth coverage of DSP fundamentals Pedagogical tools like figures flowcharts block diagrams and tables have been extensively used Review questions are given at the end of each chapter Extensive references to literature on power system protection

**Artificial Intelligence-Based Energy Management Systems for Smart Microgrids** Baseem Khan, Sanjeevikumar Padmanaban, Hassan Haes Alhelou, Om Prakash Mahela, S. Rajkumar, 2022-06-07 Modeling and optimization of energy management systems for micro and mini grids play an important role in the fields of energy generation dispatch system operation protection coordination power quality issues and peak demand conflict with grid security This comprehensive reference text provides an in depth insight into these topics This text discusses the use of meta heuristic and artificial intelligence algorithms for developing energy management systems with energy use prediction for mini and microgrid systems It covers important concepts including modeling of microgrid and energy management systems optimal protection coordination based microgrid energy management optimal energy dispatch with energy management systems and peak demand management with energy management systems Key Features Presents a comprehensive discussion of mini and microgrid concepts Discusses AC and DC microgrid modeling in detail Covers optimization of mini and microgrid systems using AI and meta heuristic techniques Provides MATLAB based simulations on a mini and microgrid Comprehensively discussing concepts of microgrids with the help of software based simulations this text will be useful as a reference text for graduate students and professionals in the fields of electrical engineering electronics and communication engineering renewable energy and clean technology

CEO—Chess Master or Gardener? Anil K. Khandelwal, 2018-04-10 Many problems of public sector banks in India are rooted in the legacy driven culture of industrial relations IR and human resource HR management These have inhibited the pace of internal reforms This book presents ways in which the author in his role as a CEO and using insights gained during field research undertook creative destruction of the legacy culture in IR HR in Bank of Baroda This was done through multiple initiatives including reordering the pattern of IR management and game changing

innovations in employee engagement eventually transforming the organisation into a valuable brand The book illustrates the strategic role of CEOs in designing a new future for their organisations in the face of multiple challenges through harmonising the HR function with business It also provides several insightful leadership lessons to top managements of large organisations to move from a narrowly focused HR culture to a broader HR paradigm consistent with the requirements of a competitive landscape

**Artificial Intelligence Applications in Electrical Transmission and Distribution Systems Protection** Almoataz Y. Abdelaziz, Shady Hossam Eldeen Abdel Aleem, Anamika Yadav, 2021-10-21 Artificial intelligence AI can successfully help in solving real world problems in power transmission and distribution systems because AI based schemes are fast adaptive and robust and are applicable without any knowledge of the system parameters This book considers the application of AI methods for the protection of different types and topologies of transmission and distribution lines It explains the latest pattern recognition based methods as applicable to detection classification and location of a fault in the transmission and distribution lines and to manage smart power systems including all the pertinent aspects FEATURES Provides essential insight on uses of different AI techniques for pattern recognition classification prediction and estimation exclusive to power system protection issues Presents an introduction to enhanced electricity system analysis using decision making tools Covers AI applications in different protective relaying functions Discusses issues and challenges in the protection of transmission and distribution systems Includes a dedicated chapter on case studies and applications This book is aimed at graduate students researchers and professionals in electrical power system protection stability and smart grids

**New-value Logging in the Echo Replicated File System** Andy Hisgen, 1993 Abstract Echo replicated file system uses new value logging Echo s use of new value logging provides a clean separation of the internals of the system into one module that is concerned with logging and recovery and another module that is concerned with accessing and updating the file system s on disk structures The logging module provides a restricted form of transaction The restrictions simplify its implementation but impose constraints on the file system module The file system module easily satisfies these constraints resulting in a good match overall

Franklin, 1996-03-31 This book is concerned with the architectural alternatives for client server database systems presenting

the arguments for using caching as the basis for constructing page server database systems and providing an overview of other environments in which caching related issues arise A significant amount of the text is focused on the development and simulation based performance analysis of algorithms for data caching and memory management including a performance study of seven proposed algorithms Caching based techniques to further improve system performance and scalability and client data caching as an organizing principle for distributed information systems This book is for anyone interested in the performance and architecture of distributed information systems and object based database management systems particularly Business India ,2004-03 **Journal of the Institution of Engineers (India)**. ,1995 ACM Transactions on Computer Systems ,1996 Index to IEEE Publications Institute of Electrical and Electronics Engineers,1981 Issues for 1973 cover the entire IEEE technical literature Proceedings ,1995 Corporate Governance Kevin Keasey, Mike Wright,1997-06-04 Corporate governance is the system by which organizations are governed and controlled This book provides the most recent state of the art empirical evidence on key topics in corporate governance including the voting behavior of institutional investors internal control and the management audit the remuneration of the corporate board board structures and qualifications in firms gaining quotation audit committees and the performance of firms in relation to institutional ownership **The Zebra Striped Network File System** John Henry Hartman,1994 Abstract This dissertation presents a new network file system called Zebra that provides high performance file access and is highly available Zebra stripes file data across its servers so that multiple servers may participate in a file access and the file access bandwidth therefore scales with the number of servers Zebra is also highly available because it stores parity information in the style of a RAID Patterson88 disk array this increases storage costs slightly but allows the system to continue operation even while a single storage server is unavailable Zebra is different from other striped network file systems in the way in which it stripes data Instead of striping individual files file based striping Zebra forms the data written by each client into an append only log which is then striped across the servers In addition the parity of each log is computed and stored as the log is striped I call this form of striping log based striping and its operation is similar to that of a log structured file system LFS Rosenblum91 Zebra can be thought of as a log structured network file system whereas LFS uses a log abstraction at the interface between a file server and its disks Zebra uses a log abstraction at the interface between a client and its servers Striping logs instead of files simplifies Zebra s parity mechanism reduces parity overhead and allows clients to batch together small writes I have built a prototype implementation of Zebra in the Sprite operating system Ousterhout88 Measurements of the prototype show that Zebra provides 4 5 times the throughput of the standard Sprite file system or NFS for large files and a 15 300% improvement for writing small files The utilizations of the system resources indicate that the prototype can scale to support a maximum aggregate write bandwidth of 20 Mbytes second or about ten clients writing at their maximum rate *RBE* ,2010 **Very Large Data Bases** ,1988 **Communications Architectures and Protocols** ,1991
