Challenges to Democratic Governance in Developing Countries Gedeon Mudacumura, Göktuğ Morçöl, 2014-01-04 Despite the large amounts of human and financial resources invested to foster democratic governance in developing countries statistics show that the majority of these countries have not yet achieved significant improvements in living standards While some regions make strides towards improving the living conditions of their citizens Sub Saharan Africa for instance is still trapped in poverty with more than 40% of its 600 million people living below the internationally recognized absolute poverty line of one US dollar per day Poor governance and corruption should be highlighted as the most important systemic factors contributing to poverty in developing countries As a result the institutional foundations of these countries are weakened public funds are misappropriated and policies and programs aimed at reducing poverty and fostering sustainable economic growth are undermined It is therefore not surprising that a 2008 Transparency International report found a direct link between corruption and the failure of the societal institutions designed to achieve the Millennium Development Goals in the majority of developing countries This book investigates the problems of democratic governance particularly as they relate to corruption and also whether democracy should be based on universal principles or local context and historical factors It also analyses the rule of law in promoting democratic governance and curbing corruption and if governmental non governmental organizations and civil societies are effective in promoting democratic governance and curbing corruption This book will go beyond identifying the challenges and offer plausible solutions that could be adapted to various developing countries It is premised on the importance of bridging theory and practice which has been lacking in most local and international development publications making of interest to scholars and policy makers alike concerned with public administration in developing countries

The Korean Journal of Policy Studies ,2015 Social Traps and Social Trust Michael A. Cowan,2021-01-07 The articles in this special issue of the New England Journal of Public Policy are unusual in two respects First they reflect the practical wisdom of seasoned actors rather than the theoretical knowledge of academicians The typically unexamined assumption of the academy is that good practice in the world is simply the application of sound theory from the academy It does not take long in the public arena however to discover that leaders there are not applying theory from the academy to the decisions they face Rather they base their interventions on what they have learned about people organizations conflict race and politics in the rough and tumble of living in the world Their working understandings may be valuably leavened by theory but are not guided primarily by it Second the authors were not separate individuals working on isolated issues like children engaged in parallel play but rather partners in a fluid informal collaborative social action network operating in an environment of constantly shifting challenges and possibilities for change The authors are not a collection of Is they are a we They decided pragmatically to connect their power their political and financial and social capital at critical moments to accomplish shared goals The network grew more powerful in the process becoming more than the sum of its organizational parts This volume is ours as was the collective action out of which it emerged Like a choir s songs its articles give voice to a group s experiences Each is a part of a larger whole Whenever I speak about how Hurricane Katrina changed New Orleans an audience member invariably asks Would the changes you described have occurred without a hurricane The simple answer is no but a fuller response is required to do justice to the situation Nature can create temporary vacuums but it cannot fill them The coalition led public meetings action campaigns election fights and legislative lobbying recounted here and the transformations they caused might not have happened in the wake of the great storm But they did In these pages you will meet some of those whose practical wisdom courage and integrity drove those changes
