Power System Engineering By S K Gupta:

Restructuring Electric Power Systems S K Gupta, 2018-05-10 Restructuring Electric Power System gives readers a thorough understanding of the technology involved in this very recent advance field Electricity is a commodity with several features that distinguish it from other goods and services It cannot be stored and its instant transmission requires a network of wires A pre requisite for ensuring orderly transportation of electricity under new regulatory environment is the creation of an independent entity that would channelize and control its flow in an optimum manner and without any discrimination just as a traffic policeman or air traffic controller does in respect of traffic flowing to and from several directions This causes several issues which are dealt by this book systematically This book shall be useful as text reference to field engineers undergraduate postgraduate students and the research scholars working in this field MATLAB M files and SIMULINK have been included in some of the numerical examples to assist the analysis Thus the book includes topics power flow analysis Power trading restructured market market forces and transmission issues ATC congestion management AGC and ancillary services

Artificial Intelligence and Evolutionary Computations in Engineering Systems Subhransu Sekhar Dash, K. Vijayakumar, Bijaya Ketan Panigrahi, Swagatam Das, 2017-07-11 The volume is a collection of high quality peer reviewed research papers presented in the International Conference on Artificial Intelligence and Evolutionary Computation in Engineering Systems ICAIECES 2016 held at SRM University Chennai Tamilnadu India This conference is an international forum for industry professionals and researchers to deliberate and state their research findings discuss the latest advancements and explore the future directions in the emerging areas of engineering and technology The book presents original work and novel ideas information techniques and applications in the field of communication computing and power technologies
