**The Rohingya Crisis and the Two-Faced God of Janus** Kawser Ahmed, Helal Mohiuddin, 2022-06-21 The Rohingya Crisis is now in its fifth year with no end in sight While the international community has supported the displaced Rohingyas in Bangladesh by providing humanitarian assistance what is needed now is to investigate the short and long term implications of the crisis from the host country's perspective Also it is imperative to examine the current political situation which was caused by the Myanmar military coup in February 2021 It has cast a dark shadow on the possibility of a negotiated repatriation In this volume scholars from Bangladesh and Canada have reflected upon the security situation the pandemic's impact on the Rohingyas inter group conflict environmental impact and burden sharing aspects the informal labor situation NGO intervention for resilience mapping and diaspora activities For both academics and policymakers who work in the fields of conflict resolution and peacebuilding this book will show how not intervening early in a crisis can have long term consequences

**A Contractarian Approach to Law and Justice** William E. O'Brien Jr., 2020-05-20 This book presents a distinctive version of a contractarian approach to law and justice The work argues that law and justice are social norms that arise from a process of social evolution and are binding only if and to the extent that they are mutually beneficial It explicitly rejects accounts of law and justice that are based on morality on the basis that morality itself is only legitimately founded on mutual advantage But it also rejects most existing versions of contractarianism which are based on ideas of hypothetical agreements by rational contractors in favour of an approach that is based on actually existing social norms but advocates critically examining these norms and discarding those that are not truly mutually beneficial The first half of the book develops the approach while the second half explores some of its implications for law It argues for a left libertarian approach to property an approach largely based on the common law of tort contract and criminal law and a rejection of most statutory law which is based not on mutual advantage but rather on benefiting some at the expense of others However it ultimately recognises that there are those who want a more extensive state than this approach allows and advocates a strong form of federalism to allow this provided robust exit rights are provided The book combines political philosophy economics and law into an approach that is broadly libertarian but distinctive in many respects It will be of interest to scholars in all three of those disciplines

**Principles of Economics** N. Gregory Mankiw, 2012 PRINCIPLES OF ECONOMICS 6e International Edition became a best seller after its

introduction and continues to be the most popular and widely used text in the economics classroom. Instructors found it the perfect complement to their teaching. A text by a superb writer and economist that stressed the most important concepts without overwhelming students with an excess of detail was a formula that was quickly imitated but has yet to be matched. The sixth edition features a strong revision of content in all thirty-six chapters. Dozens of new applications emphasize the real-world relevance of economics for today's students through interesting news articles, realistic case studies, and engaging problems. The premier ancillary package is the most extensive in the industry, using a team of instructors/preparers that have been with the project since the first edition. The text material is again fully integrated into Aplia, the best-selling online homework solution. I have tried to put myself in the position of someone seeing economics for the first time. My goal is to emphasize the material that students should and do find interesting about the study of the economy.

Principles of Economics N. Gregory Mankiw, 2001. In writing this textbook, Mankiw has tried to put himself in the position of someone seeing economics for the first time. The author's conversational writing style is superb for presenting the politics and science of economic theories to tomorrow's decision makers. Because Mankiw wrote it for the students, the book stands out among all other principle texts by intriguing students to apply an economic way of thinking in their daily lives. Receiving such a praise as perhaps the best ever textbook in economic principles, it's no wonder Mankiw's prize project has quickly become one of the most successful books ever to be published in the college marketplace.

**Journal of Economic Literature**, 2003. *Remaking the Wealth of the Nations* M. Chowdhury, MBA (GWU, USA), 2025-09-21. New BLURB. *Remaking the Wealth of the Nations*. The author encourages readers to reconsider economic principles, presenting a fresh perspective on bridging the wealth gap and promoting sustainable economies. In 2024, nominal GDP per capita was 53,516 in Canada, 84,590 in the U.S., and 13,966 in Mexico, despite their proximity. Why do the economies of Bangladesh and India differ from Luxembourg? *Remaking the Wealth of the Nations* outlines three strategies to tackle global wealth inequality and promote growth: 1. Artificial Productivity, 2. Leadership Matrix, 3. Bureaucracy Index. The concept of Artificial Productivity provides a new perspective on growth, moving beyond the basic definition of productivity as output per labor hour. The Leadership Matrix emphasizes the critical role of national leadership in economic progress, helping citizens evaluate candidates and choose the best leaders. The Bureaucracy Index highlights the importance of civil bureaucracy in economic development. Chowdhury's blending of groundbreaking formulas and equations demonstrates a thoughtful combination of historical analysis, contemporary economic theory, and innovative ideas aimed at enhancing global economies.

Thomas D'Aquino, David Stewart-Patterson, 2001. **Books in Print**, 1991. **The Cumulative Book Index**, 1995. A world list of books in the English language. The New York Times Index, 2006. **On Interest Rates and Asset Prices in Europe**. M. M. G. Fase, 1999. This book presents a quarter of a century of empirical research on interest rates and a variety of asset prices. It

will serve to deepen our understanding of asset price inflation The book includes extensive analysis of the measurement of interest rates with case studies from The Netherlands Belgium and EMU and emphasizes statistical measurement and the attempt to understand interest rate behaviour through statistical estimation The book also includes an examination of historical interest rate development in the long run both theoretically and empirically In conclusion Professor Fase also analyses the behaviour of bonds stocks and investment in art and examines the factors indispensable for a monetary strategy designed to target inflation

Teaching and Studying Social Issues Samuel Totten, Jon E. Pedersen, 2010-11-23 Teaching and Studying Social Issues explores major educational innovations over the past 100 years to help students analyze key social issues It covers topics like global education environmental education STS and genocide education offering insights for educators to learn from past efforts and develop new methods

*Rich Country, Poor Country* Benjamin F. Bobo, 2005-04-30 In this series of essays that span over 20 years of research Benjamin Bobo builds the case for multinational corporations to take an active role in combating poverty around the world Citing sobering statistics for example three fourths of the world's nations are classified as Third World and four fifths of the world's people live in these nations Bobo argues that huge corporate entities not only have the wherewithal but an obligation to alleviate the suffering that results from a lack of economic resources and opportunity Through these provocative and forward looking essays he presents a theoretical and practical framework for multinationals to stimulate economic development in the Third World providing access to capital entrepreneurial expertise and emerging technologies In a bold challenge to conventional thinking about wealth creation and strategic decision making Bobo applies such concepts as profit satisficing and stakeholder givebacks and proposes an agenda for change that begins in business schools the intellectual training ground for multinational managers with increased emphasis on sustainability and human development The net result he argues will be a world in which both producers and consumers benefit
