

# Prepare for sleep during the day

The elements of a good night's sleep start long before you go to bed. For a more refreshing rest, try to adopt some of these healthy sleep habits **during the day**.

## Stick to a Sleep Schedule

Go to sleep and wake up at the same time every day. This reinforces your circadian rhythm to promote healthy sleep-wake cycles.

## Write Down Your Worries

Don't take stress to bed. Research shows that writing down your worries early in the day can help you fall asleep faster at bedtime.

## Create a Healthy Sleep Environment

Your room should be a relaxing, creating a clean, cozy retreat for sleep may help your mind switch off more easily at night.

## Avoid Stimulants & Limit Alcohol

Caffeine should not be consumed four to six hours before bedtime. Limit alcohol as drinking in excess has been linked to poor sleep.

## Exercise & Get Outside

30-minutes of moderate exercise and sunshine during the day makes it easier to sleep at night—and give you a serotonin boost, too!

# and sleep more soundly at night

Want to wake up feeling refreshed? When you're ready to head to bed, follow these tips to improve the quality and quantity of **your sleep at night**.

## Don't Head to Bed When You're Not Tired

An early night might sound nice, but don't force sleep. Heading to bed before you're tired may lead to sleep anxiety and insomnia.

## Create a Daily 'Wind-Down' Routine

Hyperarousal (an active or "busy" mind) is the main reason people with insomnia can't sleep. Make time to switch off before bed.

## Block Out Noise & Light

A quiet and dark room is essential for a good night's sleep. Light exposure and noise can interfere with sleep quantity and quality.

## Make Your Bed a Sleep & Intimacy Zone

Leave work at your desk and meals in the kitchen. Your brain should only associate bed with sleep and intimate activities.

## Don't Take Your Phone or Other Devices to Bed

Unplug at night. Blue light delays the release of sleep-inducing melatonin, increases alertness, and sets back your internal sleep clock.

**Sleep Easy** Bernice Tuffery, 2021-02-15. Say goodbye to lousy sleep with this six-week step-by-step programme to help you kick insomnia to the curb forever. Bad sleep sucks. Sleep deficiency defies our biology and sabotages our days. Yet more than a third of us struggle to get to sleep or stay asleep at night. We can shake off the odd sleepless night, but when sleep difficulties persist, things start to unravel. Sleep debt takes its toll on our mood, energy, and productivity. It affects our behaviour around food and exercise, as well as eroding our immunity, even our mental and physical health. As our best efforts to help ourselves fail or perpetuate the problem, we can feel disillusioned, disempowered, and frustratingly stuck. You're not alone, and there is a way through. This six-week step-by-step guide will help you sleep easy.

Bernice Tuffery, fed up after years of compromised sleep, made it her mission to learn how to sleep well again. She'd tried early nights, warm baths, a bit of yoga, and meditation, but nothing worked. Even natural supplements over the counter, sleep aids, melatonin, and at times sleeping pills, failed to deliver a sustainable solution. As a qualitative market researcher, she was determined to know how to sleep naturally again. She discovered a proven, natural, and very learnable way to improve chronic sleep difficulties: Cognitive Behavioural Therapy for insomnia (CBTi). CBTi is recognised internationally by sleep experts as the gold standard treatment for insomnia. But with a lack of awareness, a severe shortage of experts offering it, and virtually no public funding for treatment in New Zealand and Australia, it's hard and expensive to access. From her discussions with sleep professionals, extensive research, and her lived experience of restoring her own sleep, Bernice shares her knowledge with humour and heart. Confident that CBTi can be self-taught, she offers this practical and inspiring insiders' guide to getting a good night's sleep.
