

# Sleep hygiene

**Sleep hygiene** refers to good sleep habits. The following are some ways of establishing and maintaining healthy sleep routines, and can provide long-term solutions to sleep difficulties:

## Routines

*Teach your body to get ready for sleep*

- Go to bed and get up at regular times
- Develop a personal, relaxing, pre-bed routine e.g. stretching or breathing exercises
- A hot bath 1-2 hours before bed or a warm glass of milk can help
- Teach your body to link 'bed' with 'sleeping' - avoid using the bed to eat, work, read, or use electronic devices

## Environment

*Are your surroundings suitable for sleep?*

- A cooler room with enough blankets for warmth is best
- Use heavy curtains/blinds, an eyemask and/or earplugs to block out light and noise

## Diet, exercise and napping

*What you do in the day impacts your sleep at night*

- Avoid naps, or restrict naps to less than 1 hour before 3pm
- Avoid caffeine, nicotine, and alcohol at least 4-6 hours before bed
- Avoid looking at bright screens (e.g. phone, tablet) 2-3 hours before bed
- Exercise regularly but avoid strenuous exercise within 4 hours of bedtime
- Maintain a balanced diet but avoid a large meal soon before bed

## Reactions

*How we respond to poor night's sleep can help make or break a poor sleep cycle*

- If you can't fall asleep after about 20 minutes, get up, do a calm or boring activity until you feel sleepy, then return to bed
- Avoid frequently checking the clock at night
- Try to do everything you had planned for the day, even if you slept poorly the night before

Cawood and Associates,1996 1 300 plus tips for better health give you the keys to a happier healthier longer more fulfilling life right now     *Principles of Drug Therapy in Neurology*

Michael V. Johnston, Robert Gross, 2008-05 Principles of Drug Therapy Second Edition provides comprehensive coverage of current drug therapy in neurology while providing the background information that neurologists and other clinicians need to understand its rationale. The range of new drugs available for treatment of neurological disorders is expanding rapidly along with rapid advances in the neurosciences that are uncovering disease mechanisms. Although there are many sources of drug information, most are limited to basic information about indications, dose, and side effects. However, the complexity of the nervous system is enormous, and the information needed to understand drug effects is accordingly often not readily available in a single source. The book addresses that issue by presenting 18 focused disease-related chapters by authors who are expert clinical sub-specialists as well as experts on drug therapy. The first chapter on fundamentals of drug therapy in neurology provides a readable synopsis of how the classic pharmacology concepts such as pharmacodynamics and pharmacokinetics are related to therapy in neurology. This section also discusses the pathogenesis of potentially serious side effects such as skin rashes and liver disorders and the role of pharmacogenetics in both drug effect and side effects. Outstanding chapters on movement disorders, epilepsy, and headaches cover major areas of drug treatment in neurology practice. Additional chapters cover stroke, increased intracranial pressure in the intensive care unit, dementia, multiple sclerosis, spinal cord injury, and spasticity, neuromuscular disorders, and pain. Sleep, central nervous system infections, and HIV and drug intoxications are also covered. Areas of special interest to child neurologists covered in the book include treatment of genetic, metabolic disorders and use of stimulants and other medications for childhood cognitive disorders. An excellent chapter is also provided on drug treatment of psychiatric disorders because of the importance of psychiatric drugs in neurology practice. This edition has been completely re-written from the successful edition published in the 90s and enlarged commensurate with the exciting progress in treatment in neurology.

Autoreactive T and B Cells in Nervous System Diseases Jia-Bin Sun, 1993      **Popular Science Monthly and World's Advance** ,1920      **Annual Report of the State Board of Health of the State of Kansas** Kansas State Board of Health, 1892      Adult Primary Care Pamela Vesta Meredith, Nancy Mathes Horan, 2000. This resource delivers the hands-on knowledge that nurse practitioners need in the primary care setting. Renowned authorities briefly review normal anatomy and physiology for each body system and then explain the pathophysiology, diagnosis, and management of its most common problems. The book follows NONPF curriculum guidelines, emphasizes evidence-based care approaches, and treatment guidelines from the AHCPR and NIH, and more.
