Ending the Troubles John M. Burney, Andrew J. Auge, 2024-10-29 In June 1996 the British government convened multiparty talks trying to establish peace within Northern Ireland after thirty years of bloody civil war based on religious cultural political and economic tensions known as The Troubles The talks included political parties from the two factions central to the conflict Unionists largely Protestants committed to retaining Northern Ireland within the United Kingdom and Nationalists largely Catholics committed to the reunification of Northern Ireland with the independent Republic of Ireland Fundamental questions on national identity and democracy quickly turned these proceedings into faction bickering thus failing to produce any substantive progress The emergence of new leaders in 1997 Tony Blair prime minister of Great Britain and Bertie Ahern taoiseach in the Republic of Ireland created an opportunity for reenergizing the talks chaired by the former US senator George Mitchell with all parties making a concerted effort to reach a viable resolution among Nationalists and Unionists In the game students will represent the major parties in Northern Ireland as they reconvene at the multiparty talks in 1997 to find ways to reconcile two

competing visions of Northern Irish nationalism or at least find a way for each community to tolerate one another's participation in a common constitutional arrangement. Much is at stake for another failure could lead to a full resumption of the civil war.

Environmental Politics for a Changing World Ronnie D. Lipschutz, Doreen Stabinsky, 2018-07-12 This book argues that environmental problems are first and foremost political and therefore about power. Using a framework of political economy and political ecology, the authors deconstruct current environmental problems to identify root causes and address those problems through mobilization of collective action and social power. The second edition also offers updated examples and stories of political struggles and the actors involved. Explicit attention to various forms of power in environmental politics including structural and social power. Local politics and collective action as related to global environmental politics. Discussion of emerging issues such as synthetic biology, commodification, and financialization of nature including carbon markets and geoengineering.

Social Sector Development and Governance Ramesh Chandra Das, 2023-06-28 This volume explores the impact of good governance upon social sectors' development in India and other selected economies of the world. Economic development in the true sense depends on the development of different social sectors like education, healthcare, gender equality, etc., as well as economic factors. Good governance makes the sectors perform well on the one hand and helps in economic growth and development on the other. Conversely, bad or weak governance in the form of corruption and low effectiveness of the governments may lead to poor performance of the sectors and low growth and backwardness of the economies. This book explores the associations between different social sectors' performances with quality of governance and growth and development of different economies and groups in detail and establishes theoretical and empirical examinations for the individual economies and groups from the different corners of the globe with the help of new theories and latest data. This book will be useful for students and researchers in the fields of Economics, Sociology, Political Studies, Public Finance, International Relations, Social Sciences, as well as policy makers and think tanks.
