Digital Media Processing Hazarathaiyah Malepati, 2010-06-25 Multimedia processing demands efficient programming in order to optimize functionality Data image audio and video processing some or all of which are present in all electronic devices today are complex programming environments Optimized algorithms step by step directions are difficult to create but can make all the difference when developing a new application This book discusses the most current algorithms available that will maximize your programming keeping in mind the memory and real time constraints of the architecture with which you are working A wide range of algorithms is covered detailing basic and advanced multimedia implementations along with cryptography compression and data error correction The general implementation concepts can be integrated into many architectures that you find yourself working with on a specific project Analog Devices BlackFin technology is used for examples throughout the book Discusses how to decrease algorithm development times to streamline your programming Covers all the latest algorithms needed for constrained systems Includes case studies on WiMAX GPS and portable media players

*C Algorithms for Real-time DSP* Paul M. Embree, 1995 Digital signal processing techniques have become the method of choice in signal processing as digital computers have increased in speed convenience and availability At the same time the C language is proving itself to be a valuable programming tool for real time computationally intensive software tasks This book is a complete guide to digital signal processing techniques in the C language Covers the basic principles of digital signal processing and C programming Introduces the basic real time DSP programming techniques and typical programming environments which are used with DSP microprocessors Covers the basic real time filtering techniques which are the cornerstone of one dimensional real time digital signal processing For electrical engineers and computer scientists The CD contents are on the book's main web page [www.informit.com](http://www.informit.com) title 0133373533
