

Introduction: The **pitch** of a sound, or how shrill or deep it is, is related to the **frequency** of the sound waves. The greater the number of sound waves passing by a point each second is, the higher the frequency and the pitch will be. The unit of frequency is the *hertz* (Hz).

Question: What causes the Doppler shift?

The reason that the doppler shifts is because the change of on how the car moves.

1. **Observe:** With the car's velocity (v_{source}) set to 0 m/s, click **Play**. Notice the sound waves moving away from the car in all directions.

A. Increase the frequency of the sound waves by moving the f_{source} slider to the right.

How does this affect the spacing of the waves?

The effect on the spacing of the wave is affected because the car still and its not moving so the waves are just moving away.

When the wavelength of the waves is short, the sound will be high in pitch.

B. Now decrease the frequency by moving the f_{source} slider all the way to the left.

How does this affect the spacing of the waves?

The spacing of the waves are now farther apart because I lowered the source. And its creating less waves.

Sound waves that are spaced far apart will produce a lower, deeper pitch.

2. **Measuring:** Click **Reset**. Set the frequency (f_{source}) to 1000 Hz. Change the velocity of the sound source (v_{source}) to 200 m/s. (The car is now an airplane.) At upper right, turn on the **Observed frequency (Hz)** checkbox.

Drag the observer onto the road. Click **Play**, and then click **Pause** when the sound waves first reach the observer.

A. What is the frequency of sound waves in front of the plane?

The frequency is 2427.9

B. Click **Play**, and then click **Pause** just after the plane has passed the observer.

C. What is the frequency of sound waves behind the plane?

The frequency of the plan behind is 629.8

3. **Summarize:** Based on what you have learned, how will the sound that the observer hears change as the airplane passes by? Explain your answer.

From what I learned I think that they way that the sound on what the absever hears is going change as the airplane passes because it increases.
