Chicago-Style Citation Quick Guide

The Chicago Manual of Style presents two basic documentation systems: (1) notes and bibliography and (2) author-date. Choosing between the two often depends on subject matter and the nature of sources cited, as each system is favored by different groups of scholars.

The notes and bibliography style is preferred by many in the humanities, including those in literature, history, and the arts. This style presents bibliographic information in notes and, often, a bibliography. It accommodates a variety of sources, including esoteric ones less appropriate to the author-date system.

The author-date system has long been used by those in the physical, natural, and social sciences. In this system, sources are briefly cited in the text, usually in parentheses, by author's last name and date of publication. The short citations are amplified in a list of references, where full bibliographic information is provided.

Aside from the use of notes versus parenthetical references in the text, the two systems share a similar style. Click on the tabs below to see some common examples of materials cited in each style, including examples of common electronic sources. For numerous specific examples, see [chapters 14](#) and [15](#) of the 16th edition of *The Chicago Manual of Style*.

Internet Chicago Manual Of Style

Laurie G. Kirszner, Stephen R. Mandell

Internet Chicago Manual Of Style:

Internet Research Skills Niall Ó Dochartaigh, 2012-05-17 Internet Research Skills is a clear concise guide to effective online research for social science and humanities students The first half of the book deals with publications online devoting separate chapters to academic articles books official publications and news sources which form the core secondary sources for social science research The second half of the book deals with the open web a vast and confusing realm of materials many of which have no direct print counterpart The third edition has been updated throughout and now includes coverage of cutting edge online services as well as newly developed approaches to using online materials a new chapter on organising your research and internet research methods additional material on the use of social networks for research illustrations examples and short exercises to help you put what you learn into practice Internet Research Skills is an invaluable guide for undergraduate students carrying out research projects and for postgraduate students working on theses and dissertations
