Harvard Lectures of Alfred North Whitehead Paul

Bogaard, 2017-03-21 Presents Whitehead's lectures at Harvard during the 1924-5 academic year the first philosophy lectures he ever gave Beginning in September of 1924 Alfred North Whitehead presented a regular course of 85 lectures which concluded in May of 1925 These represent the first ever philosophy lectures he gave and capture him working out the philosophical implications of the remarkable turns physics had taken in his lifetime This volume finally recreates these lectures by transcribing notes by W P Bell W E Hocking and Louise Heath taken at the time many of which have only recently been discovered and including hundreds of sketches of Whitehead's blackboard diagrams This is a unique insight into the evolution of Whitehead's thought during the months when he was drafting his seminal work *Science and the Modern World* Includes transcriptions of the lecture notes a chronology over 300 line drawings of Whitehead's blackboard sketches a bibliography of referenced works and an index to the lectures Gives an overview of the content of the 85 lectures Clarifies how these lectures represent Whitehead's philosophical insights Describes the circumstances that preserved the three sets of notes

Harvard Lectures of Alfred North Whitehead, 1925 - 1927 George Lucas, Joseph Petek, Brian G. Henning, 2021-06-01

This second volume in the critical edition reproduces more than 170 lectures delivered by Alfred North Whitehead at Harvard during his second and third years For the first time readers will be able to see the development of Whitehead's philosophy during the crucial period between the publication of *Science and the Modern World* and his delivery of the Gifford lectures that would become *Process and Reality* as he tests his theories in a classroom setting These student notes provide the long missing window into critical developments in Whitehead's thinking during this time They challenge longstanding speculations about when exactly Whitehead developed some of his most famous metaphysical concepts as well as how those concepts are to be properly interpreted against the wider backdrop of his life and thought Also included is a transcript of the only known lecture Whitehead delivered on the topic of ethics two mid year exams given to his students and nearly 2 000 footnotes that provide additional context for the lectures and alternative student accounts of key passages

The Software Arts Warren Sack, 2019-04-09 An alternative history of software that places the liberal arts at the very center of software's evolution In *The Software Arts* Warren Sack offers an alternative history of computing that places the arts at the very center of software's evolution Tracing the origins of software to eighteenth century French encyclopedists step by step descriptions of how things were made in the workshops of artists and artisans Sack shows that programming languages are the offspring of an effort to describe the mechanical arts in the language of the liberal arts Sack offers a reading of the texts of computing code algorithms and technical papers that emphasizes continuity between prose and programs He translates concepts and categories from the liberal and mechanical arts including logic rhetoric grammar learning algorithm language and simulation into terms of computer science and then considers their further translation into popular culture where they circulate as

forms of digital life He considers among other topics the arithmetization of knowledge that presaged digitization today s multitude of logics the history of demonstration from deduction to newer forms of persuasion and the post Chomsky absence of meaning in grammar With *The Software Arts Sack* invites artists and humanists to see how their ideas are at the root of software and invites computer scientists to envision themselves as artists and humanists *Essays and Articles of Alfred North Whitehead, 1917-1942* Joseph Petek, Brian G. Henning, 2025-10-31 Volume 2 of the Critical Edition s Essays and Articles EA2 captures published and unpublished essays written by Whitehead from his early London period just after joining the Aristotelian Society in 1915 through to his retirement from Harvard in 1937 until his death in 1947 This volume includes previously unknown essays as well as papers published in academic journals and monographs The better known essays in this period those that were re published in collections such as *The Aims of Education* 1929 and *Essays in Science and Philosophy* 1947 suffer from having too many variants each with their own pagination and variations making scholarly reference unnecessarily complicated EA2 for the first time presents all of Whitehead s non monograph works in a single authoritative chronologically ordered critically edited and corrected format making these volumes the single scholarly standard for researching and referencing these essays **Principia Mathematica.
