The  
Principles  
of  
Plant Biochemistry

PART I

BY

MURIEL WHELDALE ONSLOW

This book, which deals only with the higher plants, is intended for the student and for the beginner in research. The problems here considered are, in the main, those concerned with the biochemistry of the sugars and the nitrogen compounds; the former when they take part in cell-wall formation and in respiration, the latter chiefly in connection with the cytochrome and the break-down of proteins. Crude extracts are also included, but only such as are known to be characteristic of the chosen systematic group of plants.
