The textbook takes an in-depth look at the following areas important to the standard model: Work Breakdown Structures (WBS), Earned Value Management (EVM), Enterprise project management, Portfolio management, PPM, Professional responsibility and ethics, Agile life cycle. The text begins with a background section (Chapters 1-9) containing material outside of the standard model structure but necessary to prepare students for the 10 standard model knowledge areas covered in the chapters that follow. The text is rounded out by eight concluding chapters that explain advanced planning approaches, models, and projects in external environments. Recognizing that project management is an evolving field, the textbook includes sections written by industry experts who share their insight and expertise on cutting edge topics. It prepares students for upcoming trends and changes in project management while providing an overview of the project management environment today.
