IT Project Management: A Geek's Guide to Leadership Byron A. Love, 2016-10-04 This book's author Byron Love admits proudly to being an IT geek. However, he had found that being an IT geek was limiting his career path and his effectiveness. During a career of more than 31 years, he has made the transition from geek to geek leader. He hopes this book helps other geeks do the same. This book addresses leadership issues in the IT industry to help IT practitioners lead from the lowest level. Unlike other leadership books that provide a one-size-fits-all approach to leadership, this book focuses on the unique challenges that IT practitioners face. IT project managers may manage processes and technologies, but people must be led. The IT industry attracts people who think in logical, analytical ways, who have a propensity to place more emphasis on tasks and technology than on people. This has led to leadership challenges such as poor communication, poor relationship management, and poor stakeholder engagement. Critical IT projects and programs have failed because IT leaders neglect the people component of people, process, and technology. Communications skills are key to leadership. This book features an in-depth discussion of the communications cycle and emotional intelligence, providing geek leaders with tools to improve their understanding of others and to help others understand them. To transform a geek into a geek leader, this book also discusses self-leadership skills so geek leaders know how to lead others by leading themselves first. Followership and how to cultivate it among team members. How a geek leader's ability to navigate disparate social styles leads to greater credibility and influence. Integrating leadership into project management processes. The book concludes with a case study to show how to put leadership principles and practices into action and how an IT geek can transform into an effective IT geek leader.

Developing Countries and Technology Inclusion in the 21st Century Information Society Etim, Alice S., 2020-11-27 In recent years, many developing regions across the globe have made rigorous efforts to become integrated into the global information society. The development and implementation of information communication technology (ICT) devices and policies within various fields of service have significantly aided in the infrastructural progression of these countries. Despite these considerable advancements, there remains a lack of research and awareness on this imperative subject. *Developing Countries and Technology Inclusion in the 21st Century Information Society* is an essential reference source that discusses the adoption and impact of ICT tools in developing areas of the world, as well as specific challenges and sustainable uses within various professional fields. Featuring research on topics such as policy development, gender differences, and international business, this book is ideally designed for educators, policymakers, researchers, librarians, practitioners, scientists, government officials, and students seeking coverage on modern applications of ICT services in developing countries.

Law, Localism, and the Constitution John Stanton, 2023-03-24 Local government affects us all. Wherever we live, in towns, cities, villages, or the smallest of communities, there are locally elected councils tasked with representing people's interests in the running of the local area. This involves, inter alia, providing public services, maintaining

local spaces and acting as a level of democratic governance within the broader constitutional and executive structure of the state To fulfil these responsibilities though local government must be democratically legitimate it must have at its disposal reasonable means and resources to function and it must enjoy a healthy and balanced relationship with centralised government This book explores and analyses the extent to which local government in the different parts of the United Kingdom is able to function effectively and democratically It draws from local councillors views in analysing the state of local government under the current constitutional and governmental arrangements discussing issues such as councils relationships with central government citizen engagement finance and public services and the impact of recent reforms It contrasts and compares the different approaches adopted in England Scotland Wales and Northern Ireland also setting out and discussing possible reforms of local government across the United Kingdom While the focus is on the United Kingdom the work includes a comparison with other relevant jurisdictions Smart Working, Living and Organising Amany Elbanna, Yogesh K. Dwivedi, Deborah Bunker, David Wastell, 2018-12-07 This book constitutes the refereed proceedings of the IFIP WG 8.6 International Working Conference Smart Working Living and Organising on Transfer and Diffusion of IT TDIT 2018 held in Portsmouth UK in June 2018 The 17 revised full papers and 2 short papers presented were carefully reviewed and selected from 34 submissions They deal with the adoption of new classes of technology used by individuals organisations sectors and society with a particular focus on how emerging technologies are adopted and appropriated in organisations and everyday life and their impact The papers are organized in the following topical sections being smart adoption challenges sharing economy and social media government and infrastructure IT project management and revisiting concepts and theories **ECKM2015-16th European Conference on Knowledge Management** Maurizio Massaro and Andrea Garlatti, 2015-09-02 These proceedings represent the work of researchers presenting at the 16th European Conference on Knowledge Management ECKM 2015 We are delighted to be hosting ECKM at the University of Udine Italy on the 3-4 September 2015 The conference will be opened with a keynote from Dr Madelyn Blair from Pelerei Inc USA on the topic The Role of KM in Building Resilience On the afternoon of the first day Dr Daniela Santarelli from Lundbeck Italy will deliver a second keynote speech The second day will be opened by Dr John Dumay from Macquarie University Sydney Australia ECKM is an established platform for academics concerned with current research and for those from the wider community involved in Knowledge Management to present their findings and ideas to peers from the KM and associated fields ECKM is also a valuable opportunity for face to face interaction with colleagues from similar areas of interests The conference has a well established history of helping attendees advance their understanding of how people organisations regions and even countries generate and exploit knowledge to achieve a competitive advantage and drive their innovations forward The range of issues and mix of approaches followed will ensure an interesting two days 260 abstracts were initially received for this conference However the academic rigor of ECKM means that after the double blind peer review process there are 102 academic papers

15 PhD research papers 1 Masters research papers and 7 Work in Progress papers published in these Conference Proceedings These papers reflect the continuing interest and diversity in the field of Knowledge Management and they represent truly global research from many different countries including Algeria Austria Bosnia and Herzegovina Brazil Canada Chile Colombia Cuba Cyprus Czech Republic Estonia Finland France France Germany Hungary India Indonesia Iran Ireland Italy Japan Jordan Kenya Lithuania Mexico Nigeria Norway Pakistan Poland Portugal Romania Russia Slovakia Slovenia South Africa Spain Sri Lanka Sultanate of Oman Sweden Switzerland Thailand The Netherlands UK United Arab Emirates USA and Venezuela

Institutions and Economic Development Bryan Cheang, Tom G. Palmer, 2023-04-29 This book is a survey of the field of development studies from a political economy perspective It first reviews the academic literature on development and highlights the fundamental importance of institutions and social values over and above other alternative theories as determinants in long run development In this context the book draws from the works of Nobel Laureates Douglass North F A Hayek and Elinor Ostrom and argues that the ingredients of property rights the rule of law and market freedoms are essential in generating socio economic progress Successful reforms however are not simply a function of constructing formal institutions but must cohere with the social values norms and cultural commitments of local communities It is in this spirit that the book theorises on the oft neglected role that political entrepreneurs play in driving endogenous institutional change Specifically this book integrates the theoretical discussion on market driven development with a range of case studies from around the world featuring the bottom up efforts of local change agents to pursue institutional reforms and changes in social opinion

Applied Computer Science for GGOS Observatories Alexander N.J. Neidhardt, 2017-08-08 This book combines elementary theory from computer science with real world challenges in global geodetic observation based on examples from the Geodetic Observatory Wettzell Germany It starts with a step by step introduction to developing stable and safe scientific software to run successful software projects The use of software toolboxes is another essential aspect that leads to the application of generative programming An example is a generative network middleware that simplifies communication One of the book s main focuses is on explaining a potential strategy involving autonomous production cells for space geodetic techniques The complete software design of a satellite laser ranging system is taken as an example Such automated systems are then combined for global interaction using secure communication tunnels for remote access The network of radio telescopes is used as a reference Combined observatories form coordinated multi agent systems and offer solutions for operational aspects of the Global Geodetic Observing System GGOS with regard to Industry 4 0
