[Fourier Series and Boundary Value Problems](#) James Ward Brown, 2001 Published by McGraw Hill since its first edition in 1941 this classic text is an introduction to Fourier series and their applications to boundary value problems in partial differential equations of engineering and physics It will primarily be used by students with a background in ordinary differential equations and advanced calculus There are two main objectives of this text The first is to introduce the concept of orthogonal sets of functions and representations of arbitrary functions in series of functions from such sets The second is a clear presentation of the classical method of separation of variables used in solving boundary value problems with the aid of those representations

[Linear Algebra with Applications](#) John T. Scheick, 1997 Designed for the second level course in linear algebra taken by your junior or senior level mathematics engineering or science majors this text focuses on the fundamentals of linear algebra in a thematic framework which emphasizes concepts most important to applied mathematics engineering and science

[Time Series in Psychology](#) R. A.M. Gregson, 2014-05-22 First published in 1983 Psychological data are segments of life histories as such they are ordered sequences of observations and by definition time series Yet they are often anything but well behaved what regularities and invariances they have are buried from all but the most persistent investigator The most common methods of representing quantitative results in psychology are frozen outside time thus they deliberately average out much of the sequential structure that holds any sparse clues to the nature of processes within the organism This review whose simple aim is to bring together in an illuminating juxtaposition on basic results in both time series analysis and in experimental psychology thus cuts across traditions within psychology
