Integrated Models of Cognitive Systems Wayne D. Gray,2007-04-19 The field of cognitive modeling has progressed beyond modeling cognition in the context of simple laboratory tasks and begun to attack the problem of modeling it in more complex realistic environments such as those studied by researchers in the field of human factors The problems that the cognitive modeling community is tackling focus on modeling certain problems of communication and control that arise when integrating with the external environment factors such as implicit and explicit knowledge emotion cognition and the cognitive system These problems must be solved in order to produce integrated cognitive models of moderately complex tasks Architectures of cognition in these tasks focus on the control of a central system which includes control of the central processor itself initiation of functional processes such as visual search and memory retrieval and harvesting the results of these functional processes Because the control of the central system is conceptually different from the internal control required by individual functional processes a complete architecture of cognition must incorporate two types of theories of control Type 1 theories of the structure functionality and operation of the controller and type 2 theories of the internal control of functional processes including how and what they communicate to the controller This book presents the current state of the art for both types of theories as well as contrasts among current approaches to human performance models It will be an important resource for professional and student researchers in cognitive science cognitive engineering and human factors Contributors Kevin A Gluck Jerry T Ball Michael A Krusmark Richard W Pew Chris R Sims Vladislav D Veksler John R Anderson Ron Sun Nicholas L Cassimatis Randy J Brou Andrew D Egerton Stephanie M Doane Christopher W Myers Hansj rg Neth Jeremy M Wolfe Marc Pomplun Ronald A Rensink Hansj rg Neth Chris R Sims Peter M Todd Lael J Schooler Wai Tat Fu Michael C Mozer Sachiko Kinoshita Michael Shettel Alex Kirlik Vladislav D Veksler Michael J Schoelles Jerome R Busemeyer Eric Dimperio Ryan K Jessup Jonathan Gratch Stacy Marsella Glenn Gunzelmann Kevin A Gluck Scott Price Hans P A Van Dongen David F Dinges Frank E Ritter Andrew L Reifers Laura Cousino Klein Michael J Schoelles Eva Hudlicka Hansj rg Neth Christopher W Myers Dana Ballard Nathan Sprague Laurence T Maloney Julia Trommersher user Michael S Landy A Hornof Michael J Schoelles David Kieras Dario D Salvucci Niels Taatgen Erik M Altmann Richard A Carlson Andrew Howes Richard L Lewis Alonso Vera Richard P Cooper and Michael D Byrne

The Science of Emotional Intelligence Gerald Matthews, Moshe Zeidner, Richard D. Roberts, 2007 During the past decade emotional intelligence has been subjected to both scientific and public scrutiny Numerous articles have been published on the topic in both academic journals and the popular press testifying to the potential usefulness of emotional intelligence in psychology business education the home and the workplace However until now there has been no systematic synthesis that grounds emotional intelligence in contemporary theory while simultaneously sorting scientific approaches from popular fads and pseudoscience Bringing together leading international experts from a variety of sub disciplines this volume aims to integrate recent research on emotional intelligence The contributors address a set of focused questions concerning theory measures and applications How does emotional intelligence relate to personality What is the optimal approach to testing emotional intelligence How can emotional intelligence be trained In the final section of the book the volume editors distill and synthesize the main points made by these experts and set forth an agenda for building a science of emotional intelligence in the future Science of Emotional Intelligence will be an invaluable resource for researchers and professionals in psychology education the health sciences and business

Religious Emotions Willem Lemmens, Walter van Herck, 2008 In recent decades contemporary Anglo American philosophy has seen a boom in publications on the subject of the emotions TM Most publications focus on the cognitive value of emotions and on their moral significance The role which emotions play in religion however has so far received little attention In this volume a number of scholars present their research on religious emotions TM Is there a category of religious emotions TM What is so distinctive about them Was there really a Christian inspired repression of the emotions Or did Christianity also made use of the human emotional potential How is the relation between religion and emotions conditioned by the process of secularisation How and why did a shift from the concept of passion TM to that of emotion TM occur from the eighteenth century on This collection includes systematical treatments as well as historical approaches of these issues The last part gives some paradigmatical cases of religious emotions like emptiness and oceanic feeling In the study of what constitutes a human being neither religion nor emotion can be neglected The reader is invited to reflect on their interaction
