McKinnon,Kenneth John Button,Peter Nijkamp,2002 Logistics is the management function responsible for the flow of materials through the supply chain Freight transport typically accounts for a third of total logistics costs and is a major determinant of the quality of a distribution service This comprehensive and integrated collection includes a wide range of previously published articles from logistics management operations research and economics journals as well as the mainstream transport literature The volume is divided into 13 sections covering the full spectrum of research in the field including the modelling of freight flows just in time delivery modal split vehicle routing and utilisation the environmental impact of freight transport operations city logistics and telematics and the deregulation of freight markets This authoritative volume will be an essential compendium for those teaching in and researching in the rapidly expanding field of transport logistics and will be of interest to those involved in the management of logistics and formulation of public policy on freight transport

The Impact of Innovative Telecommunication Technologies on the Logistics Sector Niklas Jeschke,2008-03 Project Report from the year 2007 in the subject Business economics General grade 1 9 European Business School International University Schlo Reichartshausen Oestrich Winkel language English abstract 1 Introduction 1 1 Nature of the Problem and Objective The role of international trade has been redefined by the emergence and high pace of globalization The effects are among other things that routes of transportation become longer product life cycles shorten and the requisite for the availability of goods and services increases Christopher 2005 pp 207 Keeping this in mind the logistics industry is one of the fastest growing industries world wide and benefitted in particular of this shift towards a globalized world Even though logistics as such has prevailed over a long time it has been only recently that the industry has received an enormous boost due to the global adherence and new technical developments It was mainly because of the standardized

container that this accretion and globalization itself could happen But also the New Economy accelerated this growth to a significant extent by introducing computers and telecommunication media and thereby established a dynamic high competitive and world spanning market At the same time companies demand more and more premium solutions from logistic service providers¹ in order to cope with the competitive environment The importance of the innovative and crucial factor of telecommunication technology TT in this specific sector can therefore not be denied More importantly it is of significant matter to have an understanding as well as knowing how to implement and take advantage of these technologies in order to gain or maintain a competitive edge over rivaling companies Christopher 2005 p 9 The objective of this paper is therefore to describe the impact which modern and innovative TTs can have on the logistics sector In order to pursue this goal it is important to focus on thr *21st Century Management: A Reference Handbook* Charles Wankel,2008 Ordered as part of a set on ID 7574134 **Track Access Charges in Freight Transport** Justina Hudenko,2019-06-10 Given that there are still many unclear concepts mutual contradictions and imperfections in methodologies used in the field of track access charging this book acts as a communication tool for researchers and discusses these charges with regard to rail freight competitiveness It addresses four main topics namely the technical features of freight transportation and the costs incurred the impact of incoherence and volatility of freight traffic volume the market response to the track access charge level and the influence of transport policy and state subsidies The text will appeal to infrastructure managers around the world especially those in networks where there is an intention either to facilitate the shift of freight to railways or to develop rail freight corridors It illustrates that there are significant differences in the causation of costs on passenger and freight railways and raises important questions that must be considered when communicating with consumers and the state *Transportation & Distribution* ,1996 *Institutional and Technological Changes in Transport/logistics Field* United Nations Conference on Trade and Development. Secretariat,1999 **Transportation Journal** ,2004 **Focus on Supply Chain Management** ,2002 **Careers in Supply Chain Management** WetFeet (Firm),2008 **Strategy Planning in Logistics and Transportation** James Cooper,1993 It is now recognized that a well orchestrated logistics strategy plays an increasingly key role in an organization s success Moreover with the current emphasis on quality customer service being essential for a competitive edge more organizations are investing in the development of superior distribution services **ID Systems** ,2000-03 **Developing Multimodal Transport in Malaysia** Nazery Khalid,2006 **Plunkett's Transportation, Supply Chain & Logistics Industry Almanac** ,2007 **Journal of Economic Literature** ,2001 **Supply Chain Management and Transport Logistics** John Liu,2011-09-08 The enterprise focused framework of supply chain which an overwhelming majority of books on supply chain management SCM have adopted falls short in explaining recent developments in the real world especially the so called Wal Mart model in which a factory is a virtual logistics network of multiple international manufacturing firms The book fills the gap and examines supply chain and transport logistics The book

also includes the development of a unified methodological framework which underpins all the characteristics of the interrelationship between supply chain management and logistics It covers many aspects of the important and innovative developments well The book offers a unique coverage of integrated logistics of navigation aviation and transportation The book not only answers the urgent need for a book on supply chain management and transport logistics but also highlights the central role of supply chain logistics in the emerging fields of sustainable green humanitarian and maritime supply chains and the importance of studying supply chain management together with transport logistics It also explains the difference between supply chain logistics and manufacturing logistics It is a useful reference for those in the industry as well as for those taking related courses
