AI in Language Teaching, Learning, and Assessment Pan, Fang, 2024-02-12 The introduction of Artificial Intelligence AI has ignited a fervent academic discourse AI's role is as both a powerful ally and a potential adversary in education For instance ChatGPT is a generative AI which mimics human conversation with impressive precision Its capabilities span the educational spectrum from answering questions and generating essays to composing music and coding Yet as with any innovation its advent has sparked a spirited academic dialogue AI in Language Teaching Learning and Assessment seeks to address these concerns with rigor and thoughtfulness It explores the undeniable drawbacks of AI in language education and offers strategic insights into their prevention It scrutinizes the resources and safeguards required to ensure the ethical and secure integration of AI in academic settings This book lays out the multifaceted benefits of incorporating AI into language teaching learning and assessment Its chapters dissect the transformative impact of AI on pedagogy teaching materials assessment methodologies applied linguistics and the broader landscape of language education development This book is a valuable resource for language learners educators researchers and scholars alike It beckons to those who are keen on exploring and implementing AI in education as well as AI developers and experts seeking to bridge the chasm between technology and language education

Generative AI and Education B. Mairéad Pratschke, 2024-08-27 This volume addresses the gap in knowledge around generative AI and its applications in education It draws on the recent history of technological innovation and digital pedagogies locating generative AI in the contemporary discourse around education futures It argues that a new hybrid model of education is emerging requiring educational institutions to embed generative AI into course and programme design delivery and assessment It also proposes a shift from a focus on learning as output to

learning as a process and explores what that shift might look like Grounded in educational theory it offers actionable pedagogy informed guidance on how to position AI as a collaborator in the construction of learning in a manner that is congruent with the values and aims of education It offers advice based on evidence based digital pedagogy including frameworks for effective teaching and learning with generative AI that enable educators and designers to put these ideas into practice The book also explores the wider context informing this shift connecting narratives from governments and industry leaders on the strategic importance of generative AI and lifelong learning learning agility and future skills that make the case for the integration of competency based assessment into mainstream education Finally going beyond pedagogy and practice it considers some of the broader issues including limitations and ethics and the implications of integrating generative AI into institutional planning and design and includes a sample roadmap for education leaders to start the process of integrating generative AI into their institutions This work approaches the topic of generative AI from the vantage point of educators by addressing themes and concerns that will resonate with professionals in the sector Training, Education, and Learning Sciences Salman Nazir,2024-07-24 Proceedings of the 15th International Conference on Applied Human Factors and Ergonomics and the Affiliated Conferences Nice France 24 27 July 2024 **Emerging Technologies and Business Development in the Tropics** Nurhafizh Noor,Tan Kim Lim,Haejin Jang,Jacob Wood,K. Thirumaran,2026-03-06 It has been reported that those who live in the Tropics find themselves on the wrong side of the digital divide and lack access to basic technological infrastructure including internet connectivity However a closer look at the state of digital and technology innovation in this region reveals a more fragmented picture Against a backdrop of needing to grow businesses and seek new opportunities to unleash the potential of the Tropics the existing tensions and opportunities that technology brings to this region and the evolutionary change in business proposition and value chain there is much to still be done to better understand these issues With a Tropical region focus this book explores the extent to which emerging technologies impact business development at nation specific and regional levels It unravels the diverse factors and practices that emerge through technological innovation and its role in driving business development in the Tropics The topics covered in the book include diffusing innovations in the Tropics designing digital customer touchpoints in the Tropics synergizing operations and connectivity in the Tropics and securing the future of Smart Tropics Targeted primarily at academics business practitioners and public policy experts operating in the product and service economies this book provides theoretical and practical insights for anyone interested in the role that emerging technologies may play in business development in the Tropics
