

## Benchmarks Unpacking Form

### Benchmark:

#### **MA.3.NSO.1.3 Plot, order, and compare whole numbers up to 10,000.**

- When comparing numbers, instruction includes using an appropriately scaled number line and using place values of the thousands, hundreds, tens, and ones digits.
- Number lines, scaled by 50s, 100s, or 1000s, must be provided and can be a representation of any range of numbers.
- Within this benchmark, the expectation is to use symbols (<, >, =)

### Benchmark Vocabulary

#### Verbs

(What do students need to be able to do)

Plot numbers  
Order numbers  
Compare numbers

#### Nouns

(What students need to know)

Plot  
Order  
Compare

### What does it look like?

#### Level 5

identifies an error; plots, orders, and compares whole numbers up to 10,000 using comparison symbols (<, >, =).

#### Level 4

plots, orders, and compares whole numbers up to 10,000.

#### Level 3

plots and compares whole numbers up to 10,000 using comparison symbols (<, >, =).

#### Level 2

plots whole numbers up to 10,000.

### What prerequisite skills should students know before learning this benchmark:

- This work extends from the Grade 2 expectation to plot, order and compare up to 1,000.

### What misconceptions might students have:

- Often students think of these relational symbols as operational symbols instead. In order to address this misconception, allow students to have practice using the number line and/or place value blocks to see the relationship between one number and the other.

### Hands On Activities:

- Students will roll 4 place value dice to create a 4 digit number, then write it on a place value chart. Students (or partner) will then roll the place value dice to create a second 4 digit number, then write it in the place value chart under the first number (or on their own place value chart if with partner). Students will then create both numbers (or just their number) using place value blocks/discs. Students will then compare the numbers to determine if they are greater than, less than, or equal.
- Students will roll 4 place value dice 3 times to create three 4-digit numbers. Students will use the provided number line to plot each number on the number line. Students will use the information from the number line to put the numbers in order from least to greatest. Students may use place value discs/blocks to help order numbers if needed.
- Students will work with a partner. Each partner will then roll 4 place value dice to create a 4 digit number. Students will then build their number using place value blocks/discs. Students will then compare their numbers. Students will roll another dice that has greater than and less than on it. If it lands on greater than, then the student with the greater number takes a token, if it lands on less than then the student with the smaller number takes a token. Students play the game until 5 tokens are won.
