Advancing Knowledge-Based Economies and Societies through AI and Optimization: Innovations, Challenges, and Implications Erfan Babaei Tirkolaee ,Gerhard-Wilhelm Weber,2026-02-24 Machine learning ML and deep learning DL as two well known methods of artificial intelligence AI have emerged as powerful tools in extracting insights and patterns from vast amounts of data In the context of knowledge based economies and societies these techniques have the potential to revolutionize and optimize decision making processes drive innovation and enhance productivity By analyzing and learning from diverse data sources including digital repositories social media and sensor networks ML and DL enable the creation of knowledge driven systems that can inform policy making optimize resource allocation and facilitate effective knowledge management The intersection of these technologies presents novel solutions capable of transforming industries optimizing efficiency and tackling intricate challenges Nevertheless it also brings forth its unique set of difficulties and gives rise to significant consequences across different facets of society This Research Topic aims to showcase research on the application of ML and DL along with optimization in various domains within knowledge based economies and societies We invite contributions that explore innovative methodologies algorithms and applications in fields such as healthcare finance education agriculture and governance Topics of interest include but are not limited to natural language processing sentiment analysis recommendation systems intelligent information retrieval and data driven decision making We encourage submissions that demonstrate the practical implications and transformative potential of these technologies in addressing real world challenges and driving sustainable development In addition to highlighting the applications of ML and DL this special issue recognizes the importance of addressing ethical considerations privacy concerns and societal implications As these technologies become increasingly integrated into knowledge based economies and societies it is crucial to examine the implications for data privacy algorithmic fairness transparency and accountability We welcome contributions that delve into the ethical

frameworks governance mechanisms and policy guidelines essential for ensuring the responsible and inclusive implementation of ML and DL as well as optimization techniques in knowledge based development We invite submissions of original research case studies and theoretical viewpoints that contribute to the progress of knowledge based economies and societies through the proficient application of ML DL and optimization techniques Through the dissemination of top tier research and the encouragement of interdisciplinary collaboration this themed article collection aims to facilitate the exchange of knowledge inspire additional research efforts and advocate for evidence based practices in the development of knowledge based societies

Cognitive Kin Christophe Kolb, Jan Rosen, 2026-03-10 Now that AI has a will it s up to us to find a way For decades we built software that did what it was told and nothing else Agentic AI breaks this bargain systems that remember reason and pursue goals They arrive less like code and more like colleagues tireless fast and like any new hire occasionally in need of supervision In Cognitive Kin Christophe Kolb and Jan Rosen map the threshold where artificial intelligence stops being a feature and becomes a workforce Drawing on firsthand experience at the frontier of agentic AI they show how digital labor becomes viable why org charts give way to networks of intent and how leadership shifts to orchestration They translate the machinery memory feedback loops tool use into plain language then follow the shockwave into strategy culture and governance This isn t tomorrow s speculation It s a present tense transition that is reshaping the meaning of work and creating new sources of value The advantage will belong to firms that learn to think with thinking things working alongside intelligent systems without outsourcing judgment meaning or responsibility

industries with an expert level look at global investment in AI AI education policy AI s economic impact and the ongoing legal and ethical issues of AI usage About the reader For anyone interested in generative AI No technical experience required About the author Numa Dhamani is a natural language processing expert working at the intersection of technology and society Maggie Engler is an engineer and researcher currently working on safety for large language models [The 7th International Conference "Nanotechnology" \(GTUnano\)](#) Levan Chkhartishvili, Mikheil Chikhradze, Laszlo Kotai, 2025-12-03 Selected peer reviewed extended articles based on abstracts presented at the 7th International Conference Nanotechnology GTUnano2024 Aggregated Book [Men age like wine, women age like milk. On the differing evaluation of aging \(and body size\) depending on gender](#) Michelle Paul, 2026-02-18 Essay from the year 2025 in the subject Gender Studies grade 1 0 University of Rome La Sapienza ITALIANO DI STUDI ORIENTALI course Culture Gender Media language English abstract The essay Men age like wine women age like milk On the differing evaluation of aging and body size depending on gender examines how gendered double standards shape the social evaluation of aging and body size in contemporary media culture Using a popular internet meme comparing Tom Cruise and Kelly McGillis in 1986 and 2022 as a case study the analysis explores how men s aging is culturally framed as dignified and attractive while women s aging and weight gain are treated as signs of failure and decline The theoretical framework draws on Susan Sontag s concept of the double standard of aging Sylvia Walby s theory of patriarchy Rozanova s discourse of successful aging and Taylor and Hoskin s work on the intersection of fatness and femininity These perspectives situate the meme within broader patriarchal structures that systematically privilege men while subjecting women to intensified bodily surveillance and aesthetic expectations The analysis demonstrates that aging is not treated as a neutral biological process but as a socially evaluated marker of worth In Western media culture successful aging is associated with youthfulness productivity and self control However these expectations are gendered masculinity is linked to competence and authority qualities that are not undermined by age whereas femininity is culturally tied to youthfulness and thinness As a result women s aging is interpreted as a loss of value The meme reinforces this logic by presenting Cruise s aging as natural and respectable while McGillis s visible aging and weight gain are implicitly framed as personal shortcomings Body size intensifies this inequality The essay argues that femininity is culturally constructed as small controlled and visually pleasing meaning that larger female bodies are read as excessive and undisciplined In this way aging and fatness intersect as mechanisms of gendered control The meme though seemingly humorous functions as a vehicle for circulating and normalizing patriarchal standards By presenting its message through minimal text and visual contrast it frames gendered bias as common sense Ultimately the essay concludes that such memes are not harmless jokes but cultural artifacts that reproduce structural inequalities They contribute to a broader system in which women s worth is tied to youth and thinness while [Top 50+ AI Tools Every Professional Needs](#) Phoenix Grey, 2025-07-29 Ever felt overwhelmed by the flood of AI apps vying for your attention and wondered which ones move the
