Programming with Java Julia Case Bradley, Anita C. Millspaugh, 2002 Java has become one of the leading development languages today It plays a very important role in application development for business as well as a tool for Web programming This Java text is designed primarily for business programming students It assumes no prior programming experience and introduces students to the object oriented approach from the very beginning This text can be used for a first language course or for a more advanced programming course

Transforming IT education Christine Bruce, George M. Mohay, Glenn Smith, Ian Stoodley, Robyn Tweedale, 2006 It is by now an obvious observation that much of the world depends on information technology Our infrastructure relies on IT our buildings finance systems roads airplanes cars televisions washing machines and bread makers as does much of what we do our banking learning and communicating Almost everyone today uses information technology but few know how it works and very few indeed understand the mysteries of how to build new systems This imbalance between users and knowers grows worse every year With the dot com collapse the number of students studying computers and information technology more generally has been shrinking steadily In the long run this trend is not likely to be a good thing either in Australia or elsewhere What can we do about this IT courses worldwide report falling enrolments and high attrition The glamour of computing seemingly effortless graphics and animations and the management of massive computations and data sets is at

odds with the reality of how difficult it can be to coax computers into exhibiting these advanced capabilities and many students find the transition from the dream to reality too difficult to master One possibility is to reconceptualize both what and how we teach making IT more attractive to students without sacrificing the rigour and depth needed to produce graduates capable of life long learning against the backdrop of rapidly evolving technologies The Faculty of Information Technology at QUT has long sought to develop curricula and pedagogies that make this possible The results of this search show innovative curricula real world engagement and a dominant position in our local market for IT education QUT's strategic plan the QUT Blueprint exhorts the University to be bold experiment and engage with the real world in order to ensure we remain relevant and attuned to the needs of both our graduates and the industries that will employ them The contents of this book report on a significant part of our response to this challenge I'm honoured to be able to write this preface only a year after I joined QUT the work herein is a credit to my two predecessors as Deans of the Faculty Professors Dennis Longley and John Gough and to all the staff of the Faculty both academic and professional and current and past Hopefully it will also help to inspire a new generation of staff and students To you the reader this book is best thought of as a snapshot of a long quest to discover the secrets of how best to approach the moving feast that is IT education It will be of interest to those looking to develop new curricula of their own or benchmark their own journeys of discovery We should never imagine that we have all the answers indeed it's our hope that readers will learn from and improve on what we have achieved and share their insights with us in return so that the co evolution of ICT teaching around the world can be facilitated
