Create a charge

To charge a credit card or other payment source, you create a `Charge` object. If your API key is in test mode, the supplied payment source (e.g., card) won't actually be charged, although everything else will occur as if in live mode. (Stripe assumes that the charge would have completed successfully).

ARGUMENTS

amount *required*
A positive integer representing how much to charge, in the smallest currency unit (e.g., `100` cents to charge $1.00, or `100` to charge ¥100, a zero-decimal currency). The minimum amount is $0.50 USD or equivalent in charge currency.

currency *required*
Three-letter ISO currency code, in lowercase. Must be a supported currency.

application_fee *optional*
A fee in cents that will be applied to the charge and transferred to the application owner's Stripe account. The request must be made with an OAuth key or the `Stripe-Account` header in order to take an application fee. For more information, see the application-fees documentation.
