**Privatization in Malaysia** Jeff Tan,2007-10-02 In recent years privatisation has fallen out of favour in many countries because the underlying political factors have not been

well understood This book examines Malaysia's privatisation programme focusing on how political constraints resulted in the failure of four major privatisations the national sewerage company IWK Kuala Lumpur Light Rail Transit LRT national airline MAS and national car company Proton It considers why developing countries such as Malaysia might want to embark on privatisation the factors that lead to policy failure and what is needed to make it work It shows clearly that political motives driving privatisation often dominate purely economic considerations and thus it is necessary to analyse privatisation within the specific country context It argues that failure in the Malaysian case was due to political considerations that compromised institutional design and regulatory enforcement leading to problems associated with corruption It concludes that privatisation does not necessarily improve incentives for efficiency or enhance the finance available for capital investment and that successful privatisation depends on the state's institutional and political capacity to design and manage an appropriate set of subsidies Overall this book is a comprehensive examination of privatisation in Malaysia providing important insights for understanding the political economy of this process in other developing countries **IMDC-IST 2021**
