Team

Let's start with VR

Virtual Reality is a simulated experience that can be similar to or completely different from what is around us. It is a computer-generated simulation of a 3D environment that the user can interact with in a seemingly real or physical way. This type of simulation can involve visual displays using stereoscopic 3D images created by either a specialized computer graphics system or a personal computer, and may also include similar simulated sounds, vibrations, or other sensory feedback (e.g., force feedback).
