Index, 1992 Theoretical Nursing Afaf Ibrahim Meleis, 2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice Because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher Advances in Building Information Modeling Ozan Önder Özener, Salih Ofluoglu, Umit Isikdag, 2022-09-22 This book constitutes the refereed proceedings of the Second Eurasian BIM Forum on Advances in Building Information Modeling EBF 2021 held in Istanbul Turkey during November 11 12 2021 The 12 full papers included in this book were carefully reviewed and selected from 22 submissions They were organized in topical sections as follows BIM adoption and design process BIM for project and facilities management BIM education and novel viewpoints on BIM *Handbook of Adult Development and Learning* Carol Hoare, 2006-03-30 Adult development and learning have always existed as two separate fields of study with development falling under psychology and learning under education Recent advances in theory research and practice however have made it clear that an important reciprocal relationship exists between them advances in development frequently lead to learning and conversely learning quite often fuels development The synchronicity between development and learning is responsible for positive changes in many capacities including insight intelligence reflective and meta cognition personality expression interpersonal competence and self efficacy This synchronicity is also leading to the growth of a new discipline at the borders of adult development and learning The Handbook of Adult Development and Learning is the first to bring together the leading scholars from both adult development and learning to explore what will form the foundation for this new discipline the latest research at the intersection of these fields It examines six major aspects of their intersection foundations key areas of integration the self system higher reaches of development and learning essential contexts and specific applications An introductory chapter explains why it is so important to recognize and fuel the growth of this new discipline Subsequent chapters review the latest theoretical and empirical literature and provide a rich itinerary for future research This handbook is a must read for all who promote optimal aging It will be an invaluable reference for scholars in development and education as well as rich resource
