Faster, Better, Cheaper Howard E. McCurdy, 2003-04-01 This excellent summary of an important part of NASA's history is recommended for all readers. Choice In Faster Better Cheaper Low Cost Innovation in the U S Space Program. Howard E. McCurdy examines NASA's recent efforts to save money while improving mission frequency and performance. McCurdy details sixteen missions undertaken as the twentieth century drew to a close, including an orbit of the moon, deployment of three space telescopes, four Earth-orbiting satellites, two rendezvous with comets and asteroids, and a test of an ion propulsion engine which cost less than the sum traditionally spent on a single conventionally planned planetary mission. He shows how these missions employed smaller spacecraft and cheaper technology to undertake less complex and more specific tasks in outer space. While the technological innovation and space exploration approach that McCurdy describes is still controversial, the historical perspective on its disappointments and triumphs points to ways of developing faster, better, and cheaper as a management manifesto. Readers interested in either the management or economics of complex organizations will find a wealth of material in this well-written exposition. Fans of space travel like the author himself will also enjoy the behind-the-scenes look at NASA's operation. *Enterprise and Society* **The Economist**, 2002 *The Global Property Investor's Toolkit* Colin Barrow, 2008-04-15 How real estate investors and speculators can take their business global. The real estate boom has gone global, and those successful investors who want to keep up their profits are starting to look at emerging markets on other continents. Markets in South America, Eastern Europe, India, and Asia are currently experiencing the rapid growth that mature domestic markets experienced a few years ago. Based on the author's personal experience buying and selling dozens of overseas properties, this book provides all the relevant data investors need to evaluate properties and markets anywhere in the world.
