**Sustainable Transportation and Smart Logistics** Javier Faulin, Scott Grasman, Angel Juan, Patrick Hirsch, 2018-11-13 Sustainable Transportation and Smart Logistics Decision Making Models and Solutions provides deterministic and probabilistic models for transportation logistics problem solving and decision making The book presents an overview of the intersections between sustainability transportation and logistics and delves into the current problems associated with the implementation of sustainable transportation and smart logistics in urban settings It also offers models for addressing complex structural problems and procedures for estimating transportation externalities such as environmental and social impacts both in industrial and government arenas as well as decision making models from operational tactical and strategic management perspectives Sustainable Transportation and Smart Logistics also covers best practices for practical corporate policy implementation making it a comprehensive and vital resource for researchers graduate students practitioners and policy makers in transportation logistics urban planning economics engineering and environmental science Examines various modes of transportation Includes mathematical models for decision making in a wide variety of situations Presents public transportation and smart cities use cases OPERATIONS RESEARCH, 2018 *Women's Access to Transitional Justice in Timor-Leste* Noemí Pérez Vásquez, 2022-06-16 Seeing the role of transitional justice as an area of contestation this book focuses on the principle of equality guaranteed in the access to transitional justice mechanisms By raising women's experiences in dealing with the law and policies as well as the implications of community and family practices during post conflict situations the book shows how these mechanisms may have been implemented mechanically without considering the different intersections of discrimination the public and private divides that exist in the local context or the stereotypes and values of international and national actors The book argues that without unpacking the barriers in the administration of transitional justice the different mechanisms that are implemented in a post conflict situation may set a higher threshold for the participation of women Moreover by taking into account women's perceptions of justice it further argues that scholars have paid insufficient attention to the welfare structures that are produced after a conflict particularly the pensions of veterans Going beyond the focus on sexual violence a relationship between the violations and post conflict economic justice may have longer term consequences for women since it perpetuates their inequality and lack of recognition in times of peace The use of transitional justice may thus exacerbate the invisibility of and discrimination against certain sections of the population Inspired by the work of Hannah Arendt and based on extensive field research in Timor Leste the book has larger implications for the overarching debate on the social consequences of transitional justice **Introduction to Operations Research** Frederick S.
