Alvarez-Monzoncillo, 2022-03-03 This book deals with the Internet's influence on television The traditional value chain has been transformed giving rise to new forms of television that foster user generated content We no longer dream about interactivity but participation Accordingly the digital natives like to tag programs and films in the cyberspace each conveniently tagged so that other users can find it Although many questions have yet to be answered this decade's motto may be the tag is the medium However on demand television is unlikely to replace mass TV The Web 2.0 has brought an end to the my TV concept of the dotcom age and may put our TV in its place These changes pose serious problems The industry is facing the real threat of revenue cannibalization because current online business models are not financially rewarding The Internet is not yet a profitable market for programs that require additional revenues to advertising To date the box office video and premium television have been the main sources of revenue of the audiovisual industry This book explores the factors at play in this shift *Streaming Media with Peer-to-Peer Networks: Wireless Perspectives* Fleury,

Martin, 2012-05-31 The number of users who rely on the Internet to deliver multimedia content has grown significantly in recent years As this consumer demand grows so too does our dependency on a wireless and streaming infrastructure which delivers videos podcasts and other multimedia *Streaming Media with Peer to Peer Networks Wireless Perspectives* offers insights into current and future communication technologies for a converged Internet that promises soon to be dominated by multimedia applications at least in terms of bandwidth consumption The book will be of interest to industry managers and will also serve as a valuable resource to students and researchers looking to grasp the dynamic issues surrounding video streaming and wireless network development *Targeted Advertising Technologies in the ICT Space* Christian Schlee, 2013-10-01 In recent years the field of information and communication technology has started to change dramatically Carriers are threatened by high revenue losses requiring them to identify new revenue potentials beyond their core business Targeted advertising can be one of these revenue opportunities Christian Schlee provides a broad overview of the latest developments and trends in targeted advertising in the ICT space The author focuses on the technological aspects of targeted

advertising but also covers business and legal aspects He analyzes the most interesting use cases in the Web IPTV the mobile environment and in converged scenarios and examines important technological key building blocks

Regulating Telecommunications in the EU and China Bernd Holznagel,Junqi Xu,Thomas Hart,2009 Chinese as well as European regulatory decisions need to consider regional particularities but insist on an implementation system that never loses sight of its goal In the area of electronic communications policy this goal is the establishment of a market environment that ensures innovation high quality and affordable prices The present survey aims at improving the process of knowledge exchange between European and Chinese experts and decision makers in Information Society law and policy The EU China Information Society Project asked the authors to assess both the EU s and the Chinese status quo and to bring together both perspectives together in a joint effort to learn from the EU experiences for the Chinese decision making process today
