

For the automated transmission on the new Euro 4 vehicle range the gear selector has been removed. Its functions are carried out from the control pushbuttons located on the dashboard center panel combined with the power steering lever.

The EM control unit (Expansion Module) replaces the DMI (Data Management Interface). It controls the power takeoffs and makes it possible to implement complex applications and connections to different devices through the CAN-open line. It communicates with the other control units through the CAN DVB line.

The SCR (Selective Catalytic Reduction) - Denox 2 is on the entire Average/Heavy Euro 4 Range with the Urea Dosing System (UDS) positioned on the lower side of the frame.

The ENGINE ECM (Engine Control Module) replaces EDC MS 6.2.

The new Cluster is monochrome with more functions compared to the previous one.

The introduction of the new units and the change of the previous ones require changes of the vehicle system structure.

The following CAN lines are on the VCM unit:

- VDB - Vehicle Data Bus
- ECB - Engine Control Bus
- FMB - Fuhrpark Management Bus
