The Materiality and Spatiality of Death, Burial and Commemoration Christoph Klaus Streb, Thomas Kolnberger, 2021-09-28 Death, dying and burial produce artefacts and occur in spatial contexts The interplay between such materiality and the bereaved who commemorate the dead yields interpretations and creates meanings that can change over time Materiality is more than simple matter void of meaning or relevance The apparently inanimate has meaning It is charged with significance has symbolic and interpretative value perhaps a form of selfhood which originates from the interaction with the animate In our case gravestones bodily remains and the spatial order of the cemetery are explored for their material agency and relational constellations with human perceptions and actions Consciously and unconsciously by interacting with such materiality one is creating meaning while materiality retroactively provides a form of agency Spatiality provides more than a mere context it permits and shapes such interaction Thus artefacts, mementos and memorials are exteriorised, materialised and spatialized forms of human activity they can be understood as cultural forms the function of which is to sustain social life However they are also the medium through which values, ideas and criteria of social distinction are reproduced, legitimised or transformed This book will explore this interplay by going beyond the consideration of simple grave artefacts on the one hand and graveyards as a space on the other hand to examine the specific interrelationships between materiality, spatiality, the living and the dead The chapters in this book were originally published as a special issue of the journal *Mortality*

Looking Within: Finding an Environmental Justice and Global Citizenship Lens Karen Druffel, 2019-01-04 This volume was first published by Interdisciplinary Press in 2013 Can we adopt human rights concepts long used to frame problems of social

justice to define environmental justice Can existing social institutions provide models and tools for achieving environmental justice This volume views old models of agency through new lenses and examines how several social institutions such as law education and health care address specific environmental problems The volume presents arguments for human obligations towards the environment and future generations Scholars assess the limitations of existing models and others point to recent failures in protecting the interests of indigenous groups or species And on a hopeful note examples are given of institutions that promise some success in effecting environmental goals As this discussion of citizenship suggests much like environmental justice a global context both in definition and application is required

The Enlightenment Cyborg Allison Muri, 2007-01-01 For many cultural theorists the concept of the cyborg an organism controlled by mechanic processes is firmly rooted in the post modern post industrial post Enlightenment post nature post gender or post human culture of the late twentieth century Allison Muri argues however that there is a long and rich tradition of art and philosophy that explores the equivalence of human and machine and that the cybernetic organism as both a literary figure and an anatomical model has in fact existed since the Enlightenment In *The Enlightenment Cyborg* Muri presents cultural evidence in literary philosophical scientific and medical texts for the existence of mechanically steered or cyber humans in the works seventeenth and eighteenth century thinkers Muri illustrates how Enlightenment exploration of the notion of the man machine was inextricably tied to ideas of reproduction government individual autonomy and the soul demonstrating an early connection between scientific theory and social and political

thought She argues that late twentieth century social and political movements such as socialism feminism and even conservatism are thus not unique in their use of the cyborg as a politicized trope The Enlightenment Cyborg establishes a dialogue between eighteenth century studies and cyborg art and theory and makes a significant and original contribution to both of these fields of inquiry

Racist Love Leslie Bow,2021-12-13 In

Racist Love Leslie Bow traces the ways in which Asian Americans become objects of anxiety and desire Conceptualizing these feelings as racist love she explores how race is abstracted and then projected onto Asianized objects Bow shows how anthropomorphic objects and images such as cartoon animals in children s books home decor and cute tchotchkes contemporary visual art and artificially intelligent robots function as repositories of seemingly positive feelings and attachment to Asianness At the same time Bow demonstrates that these Asianized proxies reveal how fetishistic attraction and pleasure serve as a source of anti Asian bias and violence By outlining how attraction to popular representations of Asianness cloaks racial resentment and fears of globalization Bow provides a new means of understanding the ambivalence surrounding Asians in the United States while offering a theory of the psychological affective and symbolic dynamics of racist love in contemporary America

Beyond Columbine Julie A.

Webber,2017 NOW IN PAPERBACK School violence has become our new American horror story but it also has its roots in the way it comments on western values with respect to violence shame mental illness suicide humanity and the virtual Beyond Columbine School Violence and the Virtual offers a series of readings of school shooting episodes in the United States as well as similar cases in Finland Germany and Norway among others and their relatedness The book expands the author s central premise from her earlier book Failure to Hold which explores the hidden curriculum of American culture that is rooted in perceived inequality and the shame rage and violence that it provokes In doing so it goes further to explore the United States outdated perceptual apparatus based on a reflective liberal ideology and presents a new argument about proprioception the combined effect of a sustained lack of thought non cognitive in action that is engendered by digital media and virtual culture

The present interpretation of the virtual is not limited to video games but encompasses the entire perceptual field of information sharing and media stylization e.g. social networking television and branding More specifically American culture has immersed itself so thoroughly in a digital world that its violence and responses to violence lack reflection to the point where it confuses data with certainty School related violence is presented as a dramatic series of events with Columbine as its pilot episode
